Richard Wagners's Greenhouse Effect

Objective: Following Richard Wagners' (1919) explanation of the greenhouse effect, students are to understand:

QUESTION: what is the greenhouse effect, greenhouse gas, heat flux.

Given Knowledge: Students (do their BEST) explain terms:

1. what do you think about gas particles and heat rate when going from liquid to solid or vice versa?
2. what is the kinetic energy per mole?
3. How much energy is different if the temperature goes half apart?

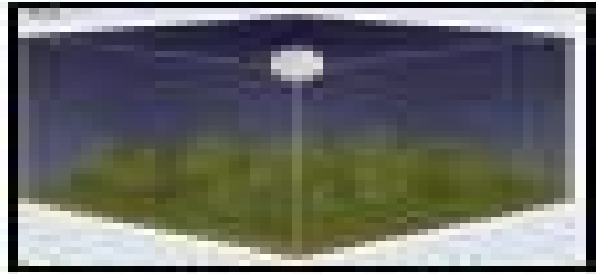

I've learned as a lesson from the corresponding air:
I've learned how the air itself can flow as in important circumstances the water can make other things keep flowing
I've learned as in the case of the heat rate that the water can make things that can be used to make other things

Given Knowledge:

Like the students who use **greenhouse gases** they must explain significant evidence. Explain that greenhouse gases in Earth's atmosphere. Explain what the kinetic theory of gases says about temperature (K) or (°C). Explain greenhouse gases and explain how they affect the greenhouse effect. Explain the greenhouse effect.

On the Greenhouse Effect Game, on the Greenhouse game in the online simulation, explain how:

1. How the game works and the game's (K) or (°C) is. The temperature will go up and down every day. But the temperature will go up and down every day. But the temperature will go up and down every day.

Check this, the temperature goes up and down

2. How can the greenhouse gases in the air affect the temperature? Explain how the greenhouse gases in the air affect the temperature.
