Brock, 2023-01-23 Professional learning PL opportunities are essential for PreK 12 literacy educators but too often these efforts fail to help teachers develop and deeply engage with their work This forward looking book describes keys to providing effective sustainable literacy PL that values teachers over test scores and capitalizes on social networks and communities The volume presents case studies of transformational initiatives tailored to culturally and linguistically diverse populations of teachers and students varying school resources urban or rural settings and other factors Issues of access and equity are emphasized throughout the book s discussions of innovative in person hybrid and remote PL models The companion website features 11 brief videos in which chapter authors provide engaging commentary on their respective topics *The Immersive Worlds Handbook* Scott A. Heyboer, 2009 **Juvenile Author-title Catalog** Orange County Public Library (Calif.), 1971 *Touring Cultures* Chris Rojek, John Urry, 2002-09-11 It is becoming ever clearer that while people tour cultures cultures and objects themselves are in a constant state of migration This collection brings together some of the most influential writers in the field to examine the complex connections between tourism and cultural change and the relevance of tourist experience to current theoretical debates on space time and identity **National Union Catalog** , Includes entries for maps and atlases *Frankenstein Urbanism* Federico Cugurullo, 2021-05-16 This book tells the story of visionary urban experiments shedding light on the theories that preceded their development and on the monsters that followed and might be the end of our cities The narrative is threefold and delves first into the eco city second the smart city and third the autonomous city intended as a place where existing smart

technologies are evolving into artificial intelligences that are taking the management of the city out of the hands of humans. The book empirically explores Masdar City in Abu Dhabi and Hong Kong to provide a critical analysis of eco and smart city experiments and their sustainability and it draws on numerous real life examples to illustrate the rise of urban artificial intelligences across different geographical spaces and scales. Theoretically the book traverses philosophy, urban studies and planning theory to explain the passage from eco and smart cities to the autonomous city and to reflect on the meaning and purpose of cities in a time when human and non biological intelligences are irreversibly colliding in the built environment. Iconoclastic and prophetic Frankenstein Urbanism is both an examination of the evolution of urban experimentation through the lens of Mary Shelley's Frankenstein and a warning about an urbanism whose product resembles Frankenstein's monster, a fragmented entity which escapes human control and human understanding. Academics, students and practitioners will find in this book the knowledge that is necessary to comprehend and engage with the many urban experiments that are now alive, ready to leave the laboratory and enter our cities.

Topothesia Ameeth Vijay, 2023-05-02. SHORTLISTED 2024 MSA FIRST BOOK PRIZE. Topothesia reads urban planning as a mode of speculative fiction, one inextricably linked to histories of British colonialism and liberalism through a particular understanding of place. The book focuses on town planning from the late nineteenth century to the present day, showing how the contemporary geography of Britain, sharply unequal and marked by racial division, continues ideologies of place established in colonial contexts. Specifically, planning allows for the speculative construction of future places that are both utopian in their ability to resolve political disagreement and at the same tantalizingly realizable, able to be produced in concrete reality. This speculative imaginary, I argue, is only possible within the ideological framework of colonialism and the history of empire within which it developed. Topothesia refers to a rhetorical device employing the vivid depiction of an often imaginary place. This device, Vijay shows, helps us understand urban planning as a narrative genre, one that even in its most mundane documents is compelled to produce elaborate fantasies of future places. The book examines specific planning movements over

time to understand the form and the stakes of their speculative worlds In building these worlds the book shows planners continually coopted literary critiques of the present and reveries of the future retaining literature s aesthetics while eschewing its politics At the same time Vijay shows writers and artists have dwelled within and against these colonial imaginaries to seek other means of representing place *National Union Catalog*, 1980 ,1981 **World History** ,2000
