My Pages, Numbers, and Keynote (for Mac and iOS) Brad Miser, 2015-03-31 Be More Productive with Pages Numbers and Keynote Pages Numbers and Keynote are Apple's office business productivity software applications. Originally a suite of software called iWork, these apps are roughly the equivalent of Microsoft Office's Word, Excel, and PowerPoint but implemented quite differently with Apple's approach to design and functionality. Written by Apple hardware and software expert Brad Miser, My Pages, Numbers, and Keynote includes full-color step-by-step tasks to walk you through these key applications so you can quickly accomplish exactly what you want through word processing, spreadsheets, and presentations. The tasks include how to store your documents on the cloud so you can work with them on any device including Mac and Windows computers, iPads, and iPhones. Use templates so that creating amazing-looking documents is fast and easy. Add text to your documents by typing or dictation and then use powerful tools to format that text easily and quickly. Enhance your Pages documents by including tables, charts, photos, tables of content, headers, footers, and more. Use Numbers spreadsheets to organize, format, calculate using built-in or custom formulas, report, and present information in tables and charts. Use Keynote to build amazing presentations including text, images, charts, animation, and more. Share your documents by creating PDFs or printing them, provide digital versions of your documents to others using email, AirDrop, or messages. Collaborate with others on your documents through comments, track changes, and in real time with iCloud.
