

HUMAN SKULL & BRAIN ANATOMY

The human brain has the same general structure as the brains of other mammals, but has a more developed cerebral cortex than any other. Large animals such as whales and elephants have larger brains in absolute terms, but when measured using the encephalization quotient, which compensates for body size, the human brain is almost twice as large as the brain of the bottlenose dolphin, and three times as large as the brain of a chimpanzee. Much of the expansion comes from the cerebral cortex, especially the frontal lobes, which are associated with executive functions such as self-control, planning, reasoning, and abstract thought. The portion of the cerebral cortex devoted to vision, the visual cortex, is also greatly enlarged in humans.

Human Skull And Brain Anatomy Speedy Study Guide

G Psacharopoulos

Human Skull And Brain Anatomy Speedy Study Guide:

Right here, we have countless books **Human Skull And Brain Anatomy Speedy Study Guide** and collections to check out. We additionally find the money for variant types and in addition to type of the books to browse.
