The book attempts to achieve the delicate balance between basic HRM functions and the new world of HRM. An organizing principle for this book is the need to for an integrated HRM system comprised of multiple activities designed to influence organizational and employee behaviors. The book's contributors include some basic theories and models that simultaneously consider how HRM activities like recruitment, selection, reward practices, and development activities among others are being impacted by contemporary issues, challenges, and opportunities for the field of HRM, particularly HRM functions and professional as they are increasingly expected to play a role in enabling organizational managers and other employees to achieve desired organizational results.
