Image Claudia Welz, 2016-08-18 How can we in our times understand the biblical concept that human beings have been created in the image of an invisible God This is a perennial but increasingly pressing question that lies at the heart of theological anthropology *Humanity in God's Image An Interdisciplinary Exploration* clarifies the meaning of this concept traces different Jewish and Christian interpretations of being created in God's image and reconsiders the significance of the imago Dei in a post Holocaust context As normative counterfactual notions human dignity and the imago Dei challenge us to see more Claudia Welz offers an interdisciplinary exploration of theological and ethical visions of the invisible By analysing poetry and art Welz exemplifies human self understanding in the interface between the visual and the linguistic The content of the imago Dei cannot be defined apart from the image carrier an embodied creature Compared to verbal visual and mental images how does this creature as a living image refer to God like a metaphor a mimetic mirror or an elusive trace Combining hermeneutical and phenomenological perspectives with philosophy of religion and philosophy of language semiotics art history and literary studies Welz regards the imago Dei as a complex sign that is at once iconic indexical and symbolical pointing beyond itself

Humanity, 1901 *Humankind and Humanity in the Philosophy of the Enlightenment* Stefanie Buchenau, Ansgar Lyssy, 2023-08-24 What makes us human beings Is it merely some corporeal aspect or rather some specific mental capacity language or some form of moral agency or social life Is there a gendered bias within the concept of humanity How do human beings become more human and can we somehow cease to be human This volume provides some answers to these fundamental questions and more by charting the increased preoccupation of the European Enlightenment with the concepts of humankind and humanity Chapters investigate the philosophical concerns of major figures across Western Europe including Montesquieu Diderot Rousseau Locke Hume Ferguson Kant Herder Johann Friedrich Blumenbach and the Comte de Buffon As these philosophers develop important descriptive and comparative approaches to the human species and moral and social ideals of humanity they present a view of the Enlightenment project as a particular kind of humanism that is different from its Ancient and Renaissance predecessors With contributions from a team of internationally recognized scholars including Stephen Gaukroger Michael Forster Cline Spector Jacqueline Taylor and G nter Z ller this book offers a novel interpretation of the Enlightenment that is both clear in focus and impressive in scope

The Profundity of Humanity Dr. İlhami Findıkcı, 2018-11-01 The primary aim of our book is to determine define and describe the rapid loss of human value at the level of individuals and society and the humanity that we started to lose in the present day Our secondary goal is to discuss the basic emotions thoughts and behavioral models that will prevail over this depreciation which is against human nature

Theories of Human Nature - Third Edition Peter Loftson, 2006-01-06 This book explores the idea of human nature and the many understandings of it put forward by such diverse figures as Aristotle Rousseau Marx Freud

Darwin and E O Wilson Each chapter looks at a different theory and offers a concise explanation assessing the theory's plausibility without forcing it into a mould Some chapters deal with the ideas of only one thinker while others such as the chapters on liberalism and feminism present a variety of different positions A clear distinction is made between theories of human nature and the political theories which so often follow from them For the new edition Loftson has addressed the new developments in the rapidly expanding genetic and paleontological record as well as expanded the discussion of the Christian theory of human nature by incorporating the ideas of the Marx scholar and social theorist G A Cohen The new edition has also been substantively revised and updated throughout

The Human Being in Action Anna-Teresa Tymieniecka, 2013-11-11 **Being Human** Dwight N. Hopkins, Dwight Hopkins whose important work in Black Theology has mediated class theological concerns through the prism of African American culture here offers a fresh take on theological anthropology Rather than defined the human as one eternal or inviolable essence however Hopkins looks to the multiple and conflicting notions of the human in contemporary thought and particularly three key variables culture self and race Hopkins critical reframing of these concepts firmly locates human endeavor development transcendence and liberation in the particular messiness of struggle and strife

The Constancy and Development in the Christology of Theodoret of Cyrrhus Vasilije Vranic, 2015-02-04 In The Constancy and Development of the Christology of Theodoret of Cyrrhus Vasilije Vranic offers an assessment of the involvement of Theodoret of Cyrrhus in the Nestorian and Miaphysite controversies of the fifth century Theodoret's Christological language and concepts are examined in their historical contexts The study is based on the comparison between the early period of Theodoret's Christological output *Expositio rectae fidei* and Refutation of the Twelve Anathemas and his mature period *Eranistes* Theodoret's Christology is ultimately vindicated and his position as a credible theologian who anticipated the definition of the Council of Chalcedon AD 451 is assured while proposing that challenges to the consistency of his Christology ought to be reconsidered

Human Nature and the Discipline of Economics Patricia Donohue-White, 2002-01-01 Foundations of Economic Personalism is a series of three book length monographs each closely examining a significant dimension of the Center for Economic Personalism's unique synthesis of Christian personalism and free economic market theory In the aftermath of the momentous geo political and economic changes of the late 1980s a small group of Christian social ethicists began to converse with free market economists over the morality of market activity This interdisciplinary exchange eventually led to the founding of a new academic

subdiscipline under the rubric of economic personalism These scholars attempt to integrate economic theory history and methodology with Christian personalism s stress upon human dignity humane social structures and social justice This second volume in the series surveys the anthropological foundations to the disciplines of economics and moral theology The first part of the book presents an overview of the German French and Polish branches of personalist thought Particular attention is given to theological anthropology especially as it is developed by such thinkers as Emmanuel Mounier Max Scheler Gabriel Marcel Karol Wojtyla and Emil Brunner Part two surveys models of human nature that have been espoused by various schools of free market thought including mainstream neoclassical economics In conclusion the authors demonstrate how an expanded understanding of human nature can augment the ability of economic science to model and predict human behavior

Lydia L. Moland,2018-08-24 This book offers an analysis of humor comedy and laughter as philosophical topics in the 19th Century It traces the introduction of humor as a new aesthetic category inspired by Laurence Sterne s Tristram Shandy and shows Sterne s deep influence on German aesthetic theorists of this period Through differentiating humor from comedy the book suggests important distinctions within the aesthetic philosophies of G W F Hegel Karl Solger and Jean Paul Richter The book links Kant s underdeveloped incongruity theory of laughter to Schopenhauer s more complete account and identifies humor s place in the pessimistic philosophy of Julius Bahnsen It considers how caricature functioned at the intersection of politics aesthetics and ethics in Karl Rosenkranz s work and how Kierkegaard and Nietzsche made humor central not only to their philosophical content but also to its style The book concludes with an explication of French philosopher Henri Bergson s claim that laughter is a response to mechanical inelasticity Becoming Human Again Bengt Kristensson Uggla,2017-01-26

One of the most influential Swedish theologians of the twentieth century Gustaf Wingren s career spanned more than forty years of upheaval both in his field and around the globe Provocative and challenging Wingren revelled in a good argument and this attitude set the tone for much of his scholarship A Swedish Lutheran he made his name through his research into the theology of Martin Luther breaking away from both traditional interpretations of Luther and the theology of his famous teachers Karl Barth and Anders Nygren before shifting his focus onto systematic theology In a fresh take Bengt Kristensson Uggla delves into the influence of Wingren s second wife Greta Hofsten on the direction of his theology Hofsten a left wing political activist who was searching for a new language of faith wove Wingren s work together with her own political

philosophy to create an unusual kind of Christian socialism Her thinking had a profound effect on Wingren causing him to recontextualise his older work entirely In *Becoming Human Again* Uggla examines how Wingren s combative nature often served him well as a theologian driving him to engage with innovations in the field and re examine his older views

Evolution of the human life-wave on earth Helena Petrovna Blavatsky,2017-07-01 A distinctive feature of Philaletheians compilations is that headings and side captions when available function as subtitles when read sequentially they impart the salient points of the entire compilation The value of this feature becomes apparent in long and complex analyses where Contents double as Train of Thoughts In this book pages 2 18 provide an outline of the main points the syllogism of propositions and further elaborations

Compendium of the Social Doctrine of the Church Catholic Church. Pontificium Consilium de Iustitia et Pace,2004 This unique unprecedented document in the history of the Church serves as a tool to inspire and guide the faithful who are faced with moral and pastoral challenges

New Aspects of Human Ethology Klaus Atzwanger,Karl Grammer,Katrin Schäfer,Alain Schmitt,2007-11-23 Rough and tumble play provided one of the paradigmatic examples of the appli tion of ethological methods back in the 1970 s Since then a modest number of searchers have developed our knowledge of this kind of activity using a variety of methods and addressing some quite fundamental questions about age changes sex diff ences nature and function of behaviour In this chapter I will review work on this topic mentioning particularly the interest in comparing results from different informants and different methods of investigation Briefly rough and tumble play or R and whose general characteristic is that the behaviours seem to be agonistic but in a non serious playful c text The varieties of R but this research had a strong practical o entation and lacked the cross species perspective and evolutionary orientation present in Groos work

The Quest for a Common Humanity Katell Berthelot,Matthias Morgenstern,2011-04-11 This volume explores the development of the idea of a common humanity for all human beings from Antiquity to the present time focussing on the other as neighbour enemy and infidel on the interpretation of the Biblical story of Abraham s sacrifice and on ancient and modern ethical and legal implications of the concept of human dignity

Sustainability, Capabilities and Human Security Andrew Crabtree,2020-02-28 Amartya Sen and Martha Nussbaum have made major contributions to development studies and social philosophy yet sustainability issues have largely remained outside their domain despite sustainability s significance and complex relation to their central value of freedom This volume explores sustainability from a capabilities perspective with the motif of human security inviting a lively discussion within the human development family After introducing the two approaches authors conceptualize relationships between capabilities and the environment examine the scientific and normative validity of environmental indicators and analyse intergenerational justice Climate change is used to exemplify that a human security approach can add an explanatory ontology to the ethical criticisms of contemporary ways of life that champion consumerism That ontology recognizes shared life experiences problems and life challenges a community of fate The volume ends with a discussion of how the approaches

can inform and sometimes critique the Sustainable Development Goals
