relations particularly its commodification and consumption this book exhibits how animals fit into human discursive practices and how this discursive position determines our perspective of animals and subsequently our treatment of them Modernity is a distinct stage of meat production and accordingly the meat commodity must be examined in all its contemporary specificity as an economic linguistic philosophical psychoanalytic and material object Using theoretical prisms that have been largely overlooked in animal studies such as Marxian analysis and Lacanian i ekian psychoanalysis and rejecting popular approaches such as analogical thinking and effacement of human animal difference this book offers new insights into the meat commodity and new ways to orient ourselves towards animal life and death
