R-5.1) Hint When the algorithm finds a match, does it know where?

R-5.1) Solution

```
public static int binarySearch(int[] data, int target, int low, int high) {
    if (low > high)
        return -1; // failed search
    else {
        int mid = (low + high) / 2;
        if (target == data[mid])
            return mid; // index of found match
        else if (target < data[mid])
            return binarySearch(data, target, low, mid - 1);
        else
            return binarySearch(data, target, mid + 1, high);
    }
}
```

R-5.2) Hint This is probably the first power algorithm you were taught.

Java 7 Exercise Solution Guide:

Thinking in Java Bruce Eckel, 2003 Provides link to sites where book in zip file can be downloaded *Head First Java* Kathy Sierra, Bert Bates, 2005-02-09 Learning a complex new language is no easy task especially when it's an object oriented computer programming language like Java You might think the problem is your brain It seems to have a mind of its own a mind that doesn't always want to take in the dry technical stuff you're forced to study The fact is your brain craves novelty It's constantly searching scanning waiting for something unusual to happen After all that's the way it was built to help you stay alive It takes all the routine ordinary dull stuff and filters it to the background so it won't interfere with your brain's real work recording things that matter How does your brain know what matters It's like the creators of the Head First approach say suppose you're out for a hike and a tiger jumps in front of you what happens in your brain Neurons fire Emotions crank up Chemicals surge That's how your brain knows And that's how your brain will learn Java Head First Java combines puzzles strong visuals mysteries and soul searching interviews with famous Java objects to engage you in many different ways It's fast it's fun and it's effective And despite its playful appearance Head First Java is serious stuff a complete introduction to object oriented programming and Java You'll learn everything from the fundamentals to advanced topics including threads network sockets and distributed programming with RMI And the new second edition focuses on Java 5.0 the latest version of the Java language and development platform Because Java 5.0 is a major update to the platform with deep code level changes even more careful study and implementation is required So learning the Head First way is more important than ever If you've read a Head First book you know what to expect a visually rich format designed for the way your brain works If you haven't you're in for a treat You'll see why people say it's unlike any other Java book you've ever read By exploiting how your brain works Head First Java compresses the time it takes to learn and retain complex information Its unique approach not only shows you what you need to know about Java syntax it teaches you to think like a Java programmer If you want to be bored buy some other book But if you want to understand Java this book's for you **The JFC Swing Tutorial** Kathy

Walrath, 2004 Written by a lead writer on the Swing team and bestselling author of *The Java Tutorial* this guidebook now fully updated and revised provides a hard copy of Sun's popular online tutorial for JFC Swing development Its numerous code examples and clear presentation style make this book a fine choice for mastering the ins and outs of JFC and Swing

Nonlinear Dynamics and Chaos with Student Solutions Manual Steven H. Strogatz, 2018-09-21 This textbook is aimed at newcomers to nonlinear dynamics and chaos especially students taking a first course in the subject The presentation stresses analytical methods concrete examples and geometric intuition The theory is developed systematically starting with first order differential equations and their bifurcations followed by phase plane analysis limit cycles and their bifurcations and culminating with the Lorenz equations chaos iterated maps period doubling renormalization fractals and strange attractors **Information Technology Questions and Answers PDF** Arshad Iqbal, The Class 7-12 Information
