Equality in Water and Sanitation Services Oliver Cumming, Tom Slaymaker, 2018-07-26 There is growing acceptance that the progress delivered under the Millennium Development Goal target for drinking water and sanitation has been inequitable. As a result, the progressive reduction of inequalities is now an explicit focus of the Sustainable Development Goal (SDG) targets adopted in 2015 for universal access to drinking water, sanitation and hygiene (WASH). This shift in focus has implications for the way in which the next generation of WASH policies and programmes will be conceived, designed, financed and monitored. This book provides an authoritative textbook for students as well as a point of reference for policy makers and practitioners interested in reducing inequalities in access to WASH services. Four key areas are addressed: background to the human right to water and development goals; dimensions of inequality; case studies in delivering water and sanitation equitably; and monitoring progress in reducing inequality.

Trafficking in Persons Report 2017 Office of the Undersecretary for Civilian Security, Democracy, and Human Rights, 2017-08-18 The 2017 Trafficking in Persons Report highlights the successes achieved and the remaining challenges before us on this important issue. The primary focus is to showcase the responsibility of governments to criminalize human trafficking and hold offenders accountable. This year's report theme is increasing criminal accountability of human traffickers and addressing challenges in prosecution, an essential component of the 3P paradigm of prosecution, protection and prevention. It provides an overview of the types of human trafficking offenses that are taking place around the world in violation of human rights. The text includes sidebars of situational human trafficking experiences to allow the reader to understand the different types that occur throughout the world. High school students and above may find this report helpful for research and writing essays about human rights and law enforcement of human trafficking. American citizens, policy analysts and decision makers, law enforcement personnel and human rights policy activists and advocates, and world leaders may refer to this report as a reference on these crimes. Internet and broadband access are becoming commonplace. Information and communication technologies (ICTs) thus represent the fastest, broadest and deepest technical change experienced in international development. They now affect every development sector, supporting the work of hundreds of millions of farmers and micro-entrepreneurs, creating millions of ICT-based jobs, assisting healthcare workers and teachers, facilitating political change, impacting climate change, but also linked with digital inequalities and harms. With the pace of change continuously accelerating, Information and Communication Technology for Development (ICT4D) provides the first dedicated textbook to examine and explain these emerging phenomena. It will help students, practitioners, researchers and other readers understand the place of ICTs within development, the ICT-enabled changes already underway and the key issues and interventions that engage ICT4D practice and strategy. The book has a three-part structure. The first three chapters set out the foundations of

ICT4D the core relation between ICTs and development the underlying components needed for ICT4D to work and best practice in implementing ICT4D Five chapters then analyse key development goals economic growth poverty eradication social development good governance and environmental sustainability Each chapter assesses the goal related impact associated with ICTs and key lessons from real world cases The final chapter looks ahead to emerging technologies and emerging models of ICT enabled development The book uses extensive in text diagrams tables and boxed examples with chapter end discussion and assignment questions and further reading Supported by online activities video links session outlines and slides this textbook provides the basis for undergraduate postgraduate and online learning modules on ICT4D
