Shoot on Sight Frederick Gooch, 2011-06-14 Rick Gooch's debut nonfiction book has exposed the illegal wildlife trade for what it is: total greed, corruption, mismanagement, and lack of education at all levels of global society at the expense of making animals that we supposedly adore and love potentially extinct. The trade is the third largest criminal money maker after Drugs and Arms trafficking, making it a multi-billion yearly industry. It highlights big business, government corruption, and inept enforcement involved in the illegal operations in Africa and Asia. The book records factual information that digs deep into the ongoing slaughter where many animals are killed for their ivory, some for their meat and skins and other parts that end up in Asian medication. It focuses on the captive trade where there are more tigers living in the USA than there is in the wild worldwide. It also gives possible solutions to many issues that need to be confronted so that the targeted animals can be given a sporting chance of survival. *Conservation and Community in Kenya* Carolyn K.

Lesorogol, 2022-06-06 Community-based wildlife conservation is promoted as a win-win solution for wildlife and people that protects biodiversity while improving the economic status of communities living among wildlife. This book, based on mixed-method anthropological research conducted in Samburu County, Kenya, demonstrates that, counter to simple narratives promising benefits, community-based wildlife conservancies (CBCs) are complex social institutions layered on pre-existing land use practices with differential impacts for members. Through in-depth research in three communities, Carolyn K. Lesorogol explains how diverse social actors understand and operate CBCs, how benefits and costs are distributed, the gendered nature of CBCs, and how they impact cooperation and conflict in communities. Lesorogol's analysis shows that economic benefits to members are generally very limited, and while many perceive improvements in security emanating from CBCs, there is also evidence that they heighten tensions over land use as well as human-wildlife conflict. Looking toward the future, the book includes recommendations for improving the effectiveness and accountability of CBCs. *Conservation and Community in Kenya: Milking the Elephant* offers critical insights into the implications of the CBC model for local pastoralist livelihoods, conservation, and social relations. *Wildlife Biodiversity Conservation* Susan C. Underkoffler, Hayley R. Adams, 2021-06-26

This book addresses the multidisciplinary challenges in biodiversity conservation with a focus on wildlife crime and how forensic tools can be applied to protect species and preserve ecosystems. Illustrated by numerous case studies covering different geographical regions and species, the book introduces the fundamentals of biodiversity, conflicts, outlines the unique challenges of wildlife crime scenes, and reviews latest techniques in environmental forensics such as DNA metagenomics. In addition, the volume explores the socio-economic perspective of biodiversity protection and provides an overview of national and international conservation laws. The field of conservation medicine stresses the importance of recognizing that human health, animal health, and ecosystem health are inextricably interdependent, and the book serves as an important contribution towards achieving the UN Sustainable Developmental Goals, in particular SDG 15 Life on Land. The

book addresses graduate students scientists and veterinary professionals working in wildlife research and conservation biology

Lake Naivasha, Kenya David M. Harper,R. Boar,M. Everard,P. Hickley,2013-04-17 This is the first comprehensive study of an east African lake for thirty years It represents the culmination of research expeditions which stretch back twenty years and is thus able to pick up long term changes which the individual research activities do not reveal Lake Naivasha is a tropical lake whose natural fluctuations are now dwarfed by human impacts Papers show how the irrigation for horticulture and power cooling has reduced the lake depth significantly exotic arrivals have altered the plant community beyond recognition and its commercial value as a fishery and a tourist feature are reduced by over use Despite this the lake has considerable conservation value at present It provides a different case study in the ever growing library of the effects of human follies Lake Naivasha has achieved global importance in the past ten years because its waters are used to sustain the largest horticultural industry in Africa The book highlights its fragility under such pressure and points out the way towards sustainable use of the water and the ecosystem

Tourism Safety, Security and Resilience Rami K. Isaac,Shem Wambugu Maingi,Vanessa GB Gowresunkaar,2024-11-18 This significant volume critically explores the implications of tourism safety and security and how communities in tourism destinations try to be resilient in the face of these impacts Written by leading scholars this book offers new insight into the conceptual and practical knowledge of community resilience due to tourism security and safety issues Chapters examine these topics through an integrated community perspective to provide comprehensive consideration of the interconnected facets of a community encompassing social economic

environmental and cultural dimensions when evaluating and addressing matters pertaining to tourism management safety security and resilience This book is structured around different conceptual theoretical and practical strategies employed by destinations to foster and sustain community resilience particularly during periods of crises as well as communities in the context of tourism recovery It examines this across geographical borders and in many different contexts not just locations of tourism or types of tourism such as religious tourism and different types of crises including natural disasters pandemics and terrorism This book is an essential reading for all tourism students researchers and academics as well as for those interested in conflict and crises recovery *Managing Water and Agroecosystems for Food Security* Eline Boelee, 2013 Water protection food production and ecosystem health are worldwide issues Changes in the global water cycle are affecting human well being in many places while widespread land and ecosystem degradation driven by poor agricultural practices is seriously limiting food production Understanding the links between ecosystems water and food production is important to the health of all three and sustainably managing these connections is becoming increasingly necessary This book shows how sustainable ecosystems especially agroecosystems are essential for water management and food production *Protected Area Conservation Strategy (PARCS)* Barbara Pitkin, 1995 Kenya Gazette ,1984-11-30 The Kenya Gazette is an official publication of the government of the Republic of Kenya It contains notices of new legislation notices required to be published by law or policy as well as other announcements that are published for general public information It is published every week usually on Friday with occasional releases of special or supplementary editions within the week Institutionalizing In-service Training in Protected Area Authorities in Africa Deborah Snelson, Annette Lanjouw, 1997 Ecology and Management of the African Buffalo Alexandre Caron, Daniel Cornélis, Philippe Chardonnet, Herbert H. T. Prins, 2023-11-23 One of iconic Africa's Big Five the African buffalo is the largest African bovine or antelope that occurs throughout most of sub Sahara and in a wide range of ecosystems from savanna to rainforest The African buffalo is also one of the most successful large African mammals in terms of abundance and biomass This species thus represents a powerful model to enhance our understanding of African biogeography and wildlife conservation ecology and management Edited by four researchers experienced in different aspects of the African buffalo's biology this volume provides an exhaustive compilation of knowledge on an emblematic species that stands out as an important component of African natural and human ecosystems It delivers a global view of the African buffalo and all known aspects of its ecology and management This book will appeal to students scholars scientists and wildlife managers as well as those enthusiastic about the charismatic species This title is also available as Open Access on Cambridge Core Coral Reefs of the Indian Ocean T. R. McClanahan, C. R. C. Sheppard, D. O. Obura, 2000-10-12 Coral reefs are among Earth's most diverse productive and beautiful ecosystems but until recently their ecology and the means to manage them have been poorly understood and documented In response to the inadequate information base for coral reefs this book reviews the ecological and conservation status of coral reefs of the Western Indian

Ocean bringing together presentations of the region's leading scientists and managers working on coral reefs. Coral Reefs of the Indian Ocean: Their Ecology and Conservation starts with a general overview of the biogeography of the region and a historical account of attempts to conserve this ecosystem. It goes on to describe the state of the reefs in each of the countries with coral reefs and it concludes with a series of management case studies. The book also summarizes most of the existing ecological information on reefs in this region and efforts at management making it useful for students, teachers and investigators interested in tropical or marine ecology, conservation biology and management and environmental sciences.

The Sustainability Ethic in the Management of the Physical, Infrastructural and Natural Resources of Zimbabwe Chirisa, Innocent, 2019-05-27. Humanity has extensively exploited natural and physical resources since the Industrial Revolution in Europe. A geological era now called the Anthropocene has been coined in environmental and developmental circles to mark the increased domination of humanity on Earth and its resources. Today the ecological footprint on the fragile planet continues to increase. Mass industrialisation like what China is doing and pushing for is one of the drivers for increased urbanisation that results in increased demand for land. It is also the stimulus behind increased deforestation, overfishing and pollution. As the fragility of the Earth increases, global bodies like the Intergovernmental Panel on Climate Change are pushing to reduce the Earth's temperature. Human efforts to manage the problem cascade from a global to a regional to a national as well as to much localised scales. Missing though are nuanced contributions at national and community levels which this book is an attempt to bridge. The nagging sense of responsibility is what this book explores under the label of sustainability ethic. As a case study, the book examines the use of sustainability ethic in the management of the physical, infrastructural and natural resources of Zimbabwe. This ethic is built on pillars that include participation of people, households in their pursuit for sustainable livelihoods, appropriate technology, tools and techniques for environmental protection. It also hinges on stewardship and structures, institutions, policies and processes of governance and sustainability. There are also the aspects of ethics, laws and indigenous technical knowledge for sustainability, capacity building and education plans and programmes for sustainability and population and demographic determinants, processes and outcomes for sustainability. The book is a timely contribution to an urgent global concern and climate change debate. **Kenya**

Tourism is a fast growing and changing industry which has become a driver of economic development in both developed and underdeveloped countries. While the tourism industry's potential for shared value creation and sustainable development is acknowledged, the concerns around the environmental and social pressures remain a challenge.

for businesses organizations and destinations This is because sustainable tourism arguably conflicts with the predominant neoliberal structure of the economy and with the hierarchical profit and consumption driven societies The emphasis on competition growth and profitability may undermine economic viability itself by consuming unreproducible resources and by undermining the six essential elements dignity people prosperity social justice planet and partnership that are conceptually linked to sustainable development The crises recurrently challenging the global travel and tourism environment including climate change bushfires extreme weather disasters pandemics and the financial crisis show the weaknesses of neoliberal approaches and the collective economic dependency of countries on tourism that is vulnerable if not completely unsustainable This vulnerability asks for understanding that the collective future depends on developing entirely new approaches and interpretation of tourism to effectively respond to the human societal social and climate challenges This book offers a novel and original perspective entailing the application of a humanistic management approach to sustainable tourism which is centered on the value of human life the protection of human dignity and the promotion of well being Multiple theoretical approaches methods and practical cases on an international scale shed light on shared value creation and human dignity as a necessary condition for its achievement in different contexts Implicitly and explicitly they respond to the current urgency to implement strategies to recover from the worldwide impact of the pandemic crisis and to provide a vision of what tourism could and should be when it recovers It will be of interest to researchers academics professionals and postgraduates in the fields of management sustainability and tourism development

Partnership for Conservation Rodney V. Salm, Yemi Tessema, 1998 *Finance*, 2005 **The Laws Protecting Animals and Ecosystems** Paul A. Rees, 2017-09-26 There is currently no basic text in wildlife law suitable for the wide range of courses in wildlife conservation and animal welfare at both bachelors and masters level or for the large number of people who work in conservation and animal welfare The Laws Protecting Animals and Ecosystems fills the gap in this significant market for a basic law text applicable to students and professionals whose primary training is in biology but who require a basic understanding of the laws relating to the protection of animals and ecosystems The text is applicable to a wide range of subjects including wildlife conservation animal handling animal welfare animal husbandry and veterinary science This foundational text supports those studying animal and ecosystem law by providing an overview of the basic legal principles national and international laws terminology the legal mechanisms used to protect animals and ecosystems and a compendium of the major animal welfare and conservation laws in major English speaking countries Dr Rees has been teaching wildlife law for 20 years and ecology for over 35 years and is ideally placed to write this book
