

Air Conditioning

AIR CONDITIONING CONTROLS

The air conditioning system features automatic temperature and air distribution control, which is programmed to maintain optimum levels of comfort within the vehicle in all but the most severe climatic conditions.

Where the controls can be adjusted manually to satisfy individual requirements, allowing the system to function automatically (in Auto mode) is by far the simplest method of operation for the driver and is preferable in most operating conditions.

1. Auto mode

- Press **AUTO** (1) for fully automatic operation.
- Press the temperature control switches (2) on either side of the display to select the required temperature.
- Let the automatic temperature control system do the rest.

In Auto mode, air distribution and blower speeds are adjusted automatically to ensure and then maintain the desired temperature (An enclosed area in the centre of the three-needle gauge will show 'AUTO' together with the air distribution and blower speed settings).

Even the air distribution and blower controls can be operated independently to override automatic setting. In this case, the status symbols will move outside the enclosure in the centre of the display to indicate that they are no longer being controlled automatically.

NOTE: If the air distribution and blower controls are operated independently, the system will not be able to achieve or maintain target temperature settings.

Air Conditioning

2. Temperature control
The temperature control switches on either side of the display allow the required temperature for the vehicle to be set. The temperature control switches can also select the air side temperature and fan speed switch for the system.

Temperatures above 20°C (68°F) and below 10°C (50°F) cannot be set. Above or below these maximum and minimum settings, the air will operate in the display.

The temperature shown on the display are colour-coded: red, temperatures only and are not affected by any special temperature measured within the vehicle interior.

NOTE: The gauge will not operate if the temperature on the passenger side of the vehicle has an error that is 3°C (5°F) greater or less than the temperature set for the driver's side.

3. Screen mode

If the instrument is missing or cannot be set, press the **SCREEN** button. The system will instantly direct its output to achieve maximum screen display by:

- setting the blower speed to maximum.
 - adjusting air flow to the screen only.
- In addition, the red and blue screen buttons are controlled by their time of operating use or momentary if they are already selected.

NOTE: Temperature and blower speed control can be adjusted and air recirculation used manually if required.

Press the **SCREEN** button a second time or press **AUTO** to leave the Default mode - the system will default automatically to Auto mode.

4. Economy mode

Press the **ECON** button to operate (the display shows 'ECON').

In economy mode the air conditioning compressor is switched off and the system functions as a conventional heating and ventilation system. This reduces the load on the engine, thereby reducing fuel consumption.

Select Economy mode whenever air conditioning is not required i.e. in cold weather when the exterior temperature is lower than the temperature required for the passenger compartment.

The air distribution, blower and recirculation controls can be operated independently.

Pressing the **Screen** button a second time will switch the air conditioning compressor on and return the system to Auto mode.

NOTE: In Economy mode, it is possible to switch the blower off (no segments showing in the display).

5. Quick button

Press to switch on or off. When switching on, note that the system automatically restores the mode and control settings that were last used.

6. Blower button

Press the button to adjust the blower speed. The blower speed increases incrementally with each press of the button, until maximum fan speed is reached (the display shows five segments and the word 'MAX').

Once the maximum fan speed has been reached, another press of the button returns the blower to its slowest speed (one segment shows in the display).
