Bender, 2022-05-31 Many NLP tasks have at their core a subtask of extracting the dependencies who did what to whom from natural language sentences. This task can be understood as the inverse of the problem solved in different ways by diverse human languages, namely how to indicate the relationship between different parts of a sentence. Understanding how languages solve the problem can be extremely useful in both feature design and error analysis in the application of machine learning to NLP. Likewise, understanding cross-linguistic variation can be important for the design of MT systems and other multilingual applications. The purpose of this book is to present in a succinct and accessible fashion information about the morphological and syntactic structure of human languages that can be useful in creating more linguistically sophisticated, more language-independent and thus more successful NLP systems. **Table of Contents** Acknowledgments Introduction motivation Morphology Introduction Morphophonology Morphosyntax Syntax Introduction Parts of speech Heads arguments and adjuncts Argument types and grammatical functions Mismatches between syntactic position and semantic roles Resources Bibliography Author's Biography General Index Index of Languages **A History of the Chinese Language** Hongyuan Dong, 2020-12-31 A History of the Chinese Language provides a comprehensive introduction to the historical development of the Chinese language from its Proto-Sino-Tibetan roots in prehistoric times to Modern Standard Chinese. Taking a highly accessible and balanced approach, it presents a chronological survey of the various stages of the Chinese language, covering key aspects such as phonology, syntax, and semantics. The second edition presents a revised and updated version that reflects recent scholarship in Chinese historical linguistics and new developments in related disciplines. Features include Coverage of the major historical stages in Chinese language development such as Old Chinese, Middle Chinese, Early Modern Chinese, and Modern Standard Chinese. Treatment of core linguistic aspects of the Chinese language including phonological changes, grammatical development, lexical evolution, vernacular writing, the Chinese writing system, and Chinese dialects. Inclusion of authentic Chinese texts throughout the book, presented within a rigorous framework of linguistic analysis to help students build up critical and evaluative skills and acquire valuable cultural knowledge. Integration of materials from different disciplines such as archaeology, genetics, history, and sociolinguistics to highlight the cultural and social background of each period of the language. Written by a highly experienced instructor.
