MARK SCHEME for the May/June 2013 series

0455 ECONOMICS

0455/21

Paper 2 (Structured Questions), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Economic Normalization with Cuba Gary Clyde Hufbauer, Barbara Kotschwar, 2014-05-05 Description For more than 50 years the United States has attempted to destabilize and isolate the Castro regime in Cuba with the use of trade and financial sanctions a policy that has fallen short of its objective In this Policy Analysis Gary Clyde Hufbauer and Barbara Kotschwar suggest that the sands of time may accomplish what economic pressure did not Ra l Castro president of Cuba since 2008 plans to step down at the end of 2018 implying a new regime in five years Various forces are starting to emerge favoring economic normalization if Cuba appears ready to change its policies as well as its leadership The authors caution however that a unilateral dismantling of US sanctions without insuring that

proper institutions are in place in Cuba could squander a golden opportunity for US companies They argue that a new US Cuba relationship must entail a lifting of Cuba's barriers to trade and investment liberalization of its economy and the adoption of democratic institutions They offer a roadmap for a future US Cuba rapprochement

Scandalous Economics
Aida A. Hozic, Jacqui True, 2016-03-10 Of all of the lies fragile alliances and predatory financial dealings that have been revealed in the wake of the Global Financial Crisis of 2008 we have yet to come to terms with the ways in which structural inequalities around gender and race factor into and indeed make possible the current economic order Scandalous Economics is about silences the astonishing neglect of gender and race in explanations of the Global Financial Crisis But it is also about noises the sexual scandals and gendered austerity policies that have relegated public debate and the crisis itself into political oblivion While feminist economists and movements such as Occupy Wall Street have pointed to the distributional inequalities that are an effect of financial deregulation scholars haven't really grappled with the representational inequalities inherent in the way we view the politics of the market For example capitalism won't be made more equitable simply by appointing women to leadership positions within financial firms or corporations And the next crisis will not be averted if our understandings of gendered inequalities are framed by sexual scandals in media and popular culture We need to look at the activities and the privileges of the advantaged the TED women of the crisis as much as the victimization of the disadvantaged to fully grasp the interplay between gender and economy in this fragile age of restoration Scandalous Economics breaks new ground by doing precisely this It argues that normalization of the post GFC economic order in the face of its obvious breakdowns has been facilitated by co-optation of feminist and queer perspectives into national and international responses to the crisis Scandalous Economics builds upon the Occupy movement and other critical analysis of the GFC to comprehensively examine gendered material ideational and representational dimensions that have served to make the crisis and its effects the new normal in Europe and America as well as Latin America and Asia

The Political Economy of Electricity
Mark Cooper, 2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today's electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge

facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach

The Velvet Rope Economy Nelson D. Schwartz, 2021-02-09 From New York Times business reporter Nelson D. Schwartz comes a bold and urgent investigation of division between the wealthy and the middle class in every arena of American life In nearly every realm of daily life from health care to education highways to home security there is an invisible velvet rope that divides how Americans live On one side of the rope for a price red tape is cut lines are jumped appointments are secured and doors are opened On the other side middle and working class Americans fight to find an empty seat on the plane a place in line with their kids at the amusement park a college acceptance or a hospital bed We are all aware of the gap between the rich and everyone else but when we weren't looking business innovators stepped in to exploit it shifting services away from the masses and finding new ways to profit by serving the privileged And as decision makers and corporate leaders increasingly live on the friction free side of the velvet rope they are less inclined to change or even notice the obstacles everyone else must contend with Schwartz's must read book takes us on a behind the scenes tour of this new reality and shows the toll the velvet rope divide takes on society

Feeding Britain Tim Lang, 2020-03-26 How does Britain get its food Why is our current system at breaking point How can we fix it before it is too late British food has changed remarkably in the last half century As we have become wealthier and more discerning our food has Europeanized pizza is children's favourite food and internationalized we eat the world's cuisines yet our food culture remains fragmented a mix of mass ultra processed substances alongside food as varied and good as anywhere else on the planet This book takes stock of the UK food system where it comes from what we eat its impact fragilities and strengths It is a book on the politics of food It argues that the Brexit vote will force us to review our food system Such an opportunity is sorely needed After a brief frenzy of concern following the financial shock of 2008 the UK government has slumped once more into a vague hope that the food system will keep going on as before Food they said just required a burst of agri technology and more exports to pay for our massive imports Feeding Britain argues that this and other approaches are short sighted against the public interest and possibly even strategic folly Setting a new course for UK food is no easy task but it is a process this book urges that needs to begin now Tim Lang has performed a public service Simon Jenkins Sunday Times

A Tempered and Humane Economy Jannett Highfill, Patricia Podd Webber, 2014-12-23 A tempered and humane economy finds a balance between the market principle

economic reward follows economic contribution and the family economic principle respect abilities respect needs Markets are tempered by the wisdom gained from family experiences in the way that steel is iron tempered by fire A humane economy meets the needs and aspirations of all persons in the way that a well tempered musical instrument allows for the playing of music in every key without discord A Tempered and Humane Economy Markets Families and Behavioral Economics argues that economists must incorporate the insights of behavioral economics into their reflections on micro and macro economic policy The elephant in the room is how Americans are increasingly raising their children with an appropriate sense of entitlement and empowerment by involving them in decision making at home We raise our children to find or create a job they will love expecting that will make them highly productive Not all children have these advantages a problem we tackle head on but enough of them do to create a critical mass of young adults who will transform our economy in a positive way for persons everywhere along the income distribution Our vision for the U S Economy is one of tempered optimism and humane prosperity
