Martin Timss Technical Report Volume 1:

Applied Rasch Measurement: A Book of Exemplars Sivakumar Alagumalai, David D. Curtis, Njora Hungi, 2006-03-30 While the primary purpose of the book is a celebration of John's contributions to the field of measurement a second and related purpose is to provide a useful resource We believe that the combination of the developmental history and theory of the method the examples of its use in practice some possible future directions and software and data files will make this book a valuable resource for teachers and scholars of the Rasch method This book is a tribute to Professor John P Keeves for the advocacy of the Rasch model in Australia Happy 80th birthday John xii There are good introductory texts on Item Response Theory Objective Measurement and the Rasch model However for a beginning researcher keen on utilising the potentials of the Rasch model theoretical discussions of test theory and associated indices do not meet their pragmatic needs Furthermore many researchers in measurement still have little or no knowledge of the features of the Rasch model and its use in a variety of situations and disciplines This book attempts to describe the underlying axioms of test theory and in particular the concepts of objective measurement and the Rasch model and then link theory to practice We have been introduced to the various models of test theory during our graduate days It was time for us to share with those keen in the field of measurement in education psychology and the social sciences the theoretical and practical aspects of objective measurement

Learning From Others Diane Shorrocks-Taylor, Edgar W. Jenkins, 2005-12-20 Diane Shorrocks Taylor School of Education University of Leeds UK In September 1998 a conference was held at the University of Leeds entitled International comparisons of pupil performance issues and policy It was arranged by two groups within the School of Education at the University the newly formed Assessment and Evaluation Unit and the Centre for Studies in Science and Mathematics Education The joint interest in international comparisons of performance had itself arisen from earlier involvement in a follow up study of the 1995 TIMSS work in England reported in a later chapter in this book in which the TIMSS assessment outcomes were studied alongside the outcomes from the National Curriculum testing programme in England Some of the results of this investigation had proved both interesting and challenging so the decision was made to promote wider discussion of some key issues by inviting contributors from all over the world to a meeting the major aims of which were to promote an exploration of the theoretical foundations of international comparative studies of student performance the practical problems of carrying out such studies the appropriateness of the assessment models and approaches used in international comparisons the role of international comparative studies in raising standards of student performance and how international studies affect the shaping of national policy on education *Situated Ethics in Educational Research* Helen Simons, Robin Usher, 2012-11-12 Ethics has traditionally been seen as a set of general principles which can be applied in a range of situations This book argues that in fact ethical principles must be shaped within different research practices and hence take on different significances according to varying research situations The book develops the notion of situated ethics

and explores how ethical issues are practically handled by educational researchers in the field Contributors present theoretical models and practical examples of what situated ethics involves in conducting research on specific areas

How Chinese Teach Mathematics: Perspectives From Insiders Lianghuo Fan, Ngai-ying Wong, Jinfa Cai, Shiqi Li, 2015-03-13 This unique book represents another concerted research effort concerning Chinese mathematics education with contributions from the world's leading scholars and most active researchers The book presents the latest original research work with a particular focus on the teaching side of Chinese mathematics education to a wide international audience There are mainly three sections in the book The first section introduces readers to a historical and contemporary perspective respectively on traditional mathematical teaching in ancient China and on how modern Chinese mathematics teachers teach and pursue their pre-service training and in-service professional development The second section presents studies investigating a wide range of issues at both the macro and micro levels on how Chinese mathematics teachers teach mathematics The third section focuses on Chinese mathematics teachers investigating issues about their knowledge, belief, teacher training and professional development Like its predecessor *How Chinese Learn Mathematics: Perspectives from Insiders* this book is a must for educational researchers, practitioners and policy makers who are interested in knowing more about mathematics teaching, teachers, teacher education and professional development concerning Chinese teachers and learners

The SAGE Handbook of Comparative Studies in Education Larry E. Suter, Emma Smith, Brian D. Denman, 2019-05-27 Educational practices have rapidly changed in the last few decades especially in how exchanges of information and learning are delivered and processed Yet while the field of international comparative studies has grown there has not been an extensive study on the relationship between educational practices, students and how practitioners are prepared and trained This handbook explores international educational practices and behaviours through new research and a review of existing research with chapters spread across six parts Part I Introduction to Research Practices in Comparative Studies of Education Part II Research Methods Part III Policy Transfer Research through International Comparisons Part IV Use of Student time in Formal and Informal Settings Part V School Practices from Early Childhood through Secondary School Part VI Conclusion Lessons from Large Scale Studies

Lessons Learned Tom Loveless, 2008-08-01 Standards for education achievement are under scrutiny throughout the industrial world In this technological age student performance in mathematics is seen as being particularly important For more than four decades international assessments conducted by the International Association for Evaluation of Educational Achievement IEA have measured how well students are learning mathematics in different countries The latest round of mathematics testing of the Trends in Mathematics and Science Study TIMSS takes place in 2007 Beyond the horse race the rankings that compare nations what have we learned from the wealth of data collected in these assessments How do US math curriculums compare to those used overseas Is the effect of technology in the classroom uniform across nations How do popular math reforms fare abroad Those are some of the critical issues tackled in this

important book The authors use the database to address several pressing questions about school policy and educational research For example Ina Mullis and Michael Martin review the major lessons learned over the history of TIMSS testing William Schmidt and Richard T Houang examine whether curricular breadth affects student achievement Jeremy Kilpatrick Vilma Mesa and Finbarr Sloane evaluate American performance in algebra relative to other nations and pinpoint strengths and weaknesses in American students learning of algebra

Methodological Advances in Cross-National Surveys of Educational Achievement National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Testing and Assessment, Board on International Comparative Studies in Education, 2002-06-14 In November 2000 the Board on International Comparative Studies in Education BICSE held a symposium to draw on the wealth of experience gathered over a four decade period to evaluate improvement in the quality of the methodologies used in international studies and to identify the most pressing methodological issues that remain to be solved Since 1960 the United States has participated in 15 large scale cross national education surveys The most assessed subjects have been science and mathematics through reading comprehension geography nonverbal reasoning literature French English as a foreign language civic education history computers in education primary education and second language acquisition The papers prepared for this symposium and discussions of those papers make up the volume representing the most up to date and comprehensive assessment of methodological strengths and weaknesses of international comparative studies of student achievement These papers answer the following questions 1 What is the methodological quality of the most recent international surveys of student achievement How authoritative are the results 2 Has the methodological quality of international achievement studies improved over the past 40 years and 3 What are promising opportunities for future improvement

Re-Evaluating Education in Japan and Korea Hyunjoon Park, 2013-07-18 International comparisons of student achievement in mathematics science and reading have consistently shown that Japanese and Korean students outperform their peers in other parts of world Understandably this has attracted many policymakers and researchers seeking to emulate this success but it has also attracted strong criticism and a range of misconceptions of the Japanese and Korean education system Directly challenging these misconceptions which are prevalent in both academic and public discourses this book seeks to provide a more nuanced view of the Japanese and Korean education systems This includes the idea that the highly standardized means of education makes outstanding students mediocre that the emphasis on memorization leads to a lack of creativity and independent thinking that students successes are a result of private supplementary education and that the Japanese and Korean education systems are homogenous to the point of being one single system Using empirical data Hyunjoon Park re evaluates the strengths and weaknesses of the existing education systems in Japan and Korea and reveals whether the issues detailed above are real or unfounded and misinformed Offering a balanced view of the evolving and complex nature of academic achievement among Japanese and Korean students this book will appeal to students and scholars

of Asian international and comparative education as well as those interested in Asian society more broadly
