Mathematics and Transition to School Bob Perry, Amy MacDonald, Ann Gervasoni, 2015-01-09 This edited book brings together for the first time an international collection of work focused on two important aspects of any young child's life learning mathematics and starting primary or elementary school The chapters take a variety of perspectives and integrate these two components in sometimes explicit and sometimes more subtle ways The key issues and themes explored in this book are the mathematical and other strengths that all participants in the transition to school bring to this period of a child's life the opportunities provided by transition to school for young children's mathematics learning the importance of partnerships among adults and among adults and children for effective school transitions and mathematics learning and teaching the critical impact of expectations on their mathematics learning as children start school the importance of providing children with meaningful challenging and relevant mathematical experiences throughout transition to school the entitlement of children and educators to experience assessment and instructional pedagogies that match the strengths of the learners and the teachers the importance for the aspirations of children families communities educators and educational organisations to be recognised as legitimate and key determinants of actions experiences and successes in both transition to school and mathematics learning and the belief that young children are powerful mathematics learners who can demonstrate this power as they start school In each chapter authors reflect on their work in the area of mathematics and transition to school place that work within the overall context of research in these fields predict the trajectory of this work in the future and consider the implications of the work both theoretically and practically

Future Earth Diana Dalbotten, Gillian Roehrig, Patrick Hamilton, 2014-06-23 Earth now is dominated by both biogeophysical and anthropogenic processes as represented in these two images from a simulation of aerosols Dust red from the Sahara sweeps west across the Atlantic Ocean Sea salt blue rises into the atmosphere from winds over the North Atlantic and from a tropical cyclone in the Indian Ocean Organic and black carbon green from biomass burning is notable over the Amazon and Southeast Asia Plumes of sulfate white from fossil fuel burning are particularly prominent over northeastern North America and East Asia If present trends of dust emissions and fossil fuel burning continues in what we call the Anthropocene epoch then we could experience high atmospheric CO₂ levels leading to unusual

warming rarely experienced in Earth's history This book focuses on human influences on land ocean and the atmosphere to determine if human activities are operating within or beyond the safe zones of our planet's biological chemical and physical systems Volume highlights include Assessment of civic understanding of Earth and its future Understanding the role of undergraduate geoscience research and community driven research on the Anthropocene Effective communication of science to a broader audience that would include the public the K 12 science community or populations underrepresented in the sciences Public outreach on climate education geoscience alliance and scientific reasoning Future Earth is a valuable practical guide for scientists from all disciplines including geoscientists museum curators science educators and public policy makers

The Next Generation of STEM Teachers Patrick M. Jenlink, Karen Embry Jenlink, 2019-04-13 STEM Teaching An Interdisciplinary Approach breaks from the more historical idea of making knowledge within disciplines and seeks to engage the reader in a growing conversation that is gaining momentum and is focused on an interdisciplinarity of STEM education which seeks to embrace and or present emerging perspectives on the standards Importantly the conversation on STEM education and interdisciplinary approaches to teacher preparation may draw into specific relief the respective professional and or disciplinary standards for each of the four STEM disciplines as each relates to fostering an interdisciplinary approach The importance and relevance of this interdisciplinary perspective to teacher preparation lies in the realization that STEM literacy moves into everyday lives and thinking and not just in STEM related disciplines This means that faculty in teacher preparation need to extend the range of STEM literacy in pedagogical strategies so that STEM teaching is enriched with multimodal literacies into teaching and learning which in turn makes STEM knowledge more relevant and engaging for its manifest connections to solving the problems that challenge society

Primary Mathematics for Trainee Teachers Marcus Witt, 2014-11-19 With chapter sequencing following the new Curriculum this book supports trainee Primary school teachers to make use of the opportunities presented in the new National Curriculum for effective and engaging Mathematics teaching Covering all of the areas of the new Curriculum for primary mathematics and offering insight into effective teaching this book helps students connect what they need to teach with how it can be taught Exploring opportunities in the new curriculum for creative and imaginative teaching it shows readers how to capitalize on opportunities to develop children s reasoning and problem solving skills It explores how to make links between mathematics and children s lived experiences to enhance their learning and enables trainees to develop an ability to plan with discernment making the most of existing thinking and research as well as building confidence in adapting and customizing ideas Includes the full National Curriculum Programme of Study for Maths key stages 1 and 2 as a useful reference for trainee teachers Other books in this series include Primary English for Trainee Teachers

Latin American Perspectives on Science and Religion Ignacio Silva, 2015-10-06 Latin America plays an increasingly important role in the development of modern Christianity yet it has been underrepresented in current scholarship on religion and science In this first book on the subject contributors explore the different ways that religion and science relate to each other *Expectations and Aspirations* Safaa El Tayeb El-Kogali, Caroline Krafft, 2019-01-30 Education which has been at the heart of the Middle East and North Africa MENA region s history and civilizations for centuries has a large untapped potential to contribute to human capital well being and wealth The region has invested heavily in education for decades but it has not been able to reap the benefits of its investments Despite a series of reforms MENA has remained stuck in a low learning low skills level Expectations and Aspirations A New Framework for Education in the Middle East and North Africa identifies four key sets of tensions that are holding back education in the region credentials and skills discipline and inquiry control and autonomy and tradition and modernity These tensions are shaped by society and are reflected in classrooms If they are not addressed MENA will continue to operate at a level below its potential This report outlines a new framework with a three pronged approach that can help address these tensions and unleash the potential of education in MENA A concerted push for learning that starts early for all children regardless of background with qualified and motivated educators and that leverages technology uses modern approaches and monitors learning outcomes A stronger pull for skills by all stakeholders in the labor market and society that involves coordinated multisystem reforms within and beyond the education system A new pact for education at the national level with a unified vision shared responsibilities and accountabilities Education is not just the responsibility of the education system it is everyone s business The push pull and pact framework

offers an opportunity for MENA to move forward to reclaim its heritage of a learned region and to meet the expectations and aspirations of its people. The current situation in MENA requires a renewed focus on education not just as a national priority for economic growth and social development but as a national emergency for stability, peace and prosperity. *The World of Science Education* Femi S. Otulaja, Meshach B. Ogunniyi, 2017-09-12. Each volume in the 7 volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub-Saharan Africa and the scholarship that most closely support this program. The reviews of the research situate what has been accomplished within a given field in Sub-Saharan Africa rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished, what is missing, and what might be done next.

Neutrosophic Sets and Systems, Vol. I Florentin Smarandache, Mumtaz Ali, This volume is a collection of ten papers written by different authors and co-authors listed in the order of the papers: F. Smarandache, Jun Ye, M. Shabir, M. Ali, M. Naz, F. Yuhua, A. A. Salama, S. Vladutescu, Y. Guo, A. Sengur, S. Broumi, P. Chi, and P. Liu. In the first paper, the author proposed Neutrosophic Measure and Neutrosophic Integral. Another Form of Correlation Coefficient between Single Valued Neutrosophic Sets and Multiple Attribute Decision Making Method is proposed in the second paper. Soft Neutrosophic Group is studied in the third paper. In the fourth paper, Neutrosophic Example in Physics is discussed. Similarly, in the fifth paper, Filters via Neutrosophic Crisp Sets are discussed. In the sixth paper, Communication vs. Information: an Axiomatic Neutrosophic Solution is presented by the authors. A Novel Image Segmentation Algorithm Based on Neutrosophic Filtering and Level Set is given in the seventh paper. Paper eight is about Neutrosophic Crisp Points and Neutrosophic Crisp Ideals. In the next paper, Several Similarity Measures of Neutrosophic Sets are discussed. The authors introduced an Extended TOPSIS Method for the Multiple Attribute Decision Making Problems Based on Interval Neutrosophic Sets in the last paper.

A Local Assessment Toolkit to Promote Deeper Learning Karin Hess, 2018-02-28. For years, educators have turned to the Hess Cognitive Rigor Matrices (CRM) when it comes to assessment. Now, for the first time, the modules are packaged into one resource to help teachers evaluate the quality and premise of their current assessment system.
