Sanders, 1994-04-06 The Program Evaluation Standards is a must have book for anyone responsible for reviewing evaluation proposals planning and conducting evaluations managing evaluation projects or judging the merit and worth of evaluations once completed For experienced practitioners it provides a set of values and principles by which to guide successful practice that is a set of criteria that determines whether educational evaluations are trustworthy and fair The Standards sets expectations of the design and implementation of educational evaluation for all practitioners in all types of educational arenas even those involved in social programming endeavors For newcomers and those less experienced who may be responsible for commissioning and using evaluations the Standards supplies a useful framework of generating a list of questions to raise about any evaluation plan or final report in an effort to assess its pros and cons The book is an invaluable how to resource for graduate students venturing out into the field and it instills a sense of what it means to be a responsible evaluator For clients or consumers the book offers advice on what they should expect of an evaluation Publisher description Linking and Aligning Scores and Scales Neil J. Dorans, Mary Pommerich, Paul W. Holland, 2007-10-15 In their preface to the second edition of Test Equating Scaling and Linking Mike Kolen and Bob Brennan 2004 made the following observation Prior to 1980 the subject of equating was ignored by most people in the measurement community except for psychometricians who had responsibility for equating p vii The authors went on to say that considerably more attention is now paid to equating indeed to all forms of linkages between tests and

that this increased attention can be attributed to several factors 1 An increase in the number and variety of testing programs that use multiple forms and the recognition among professionals that these multiple forms need to be linked 2 Test developers and publishers in response to critics often refer to the role of linking in reporting scores 3 The accountability movement and fairness issues related to assessment have become much more visible Those of us who work in this field know that ensuring comparability of scores is not an easy thing to do Nonetheless our customers the test takers and score users either assume that scores on different forms of an assessment can be used interchangeably or like the critics above ask us to justify our comparability assumptions And they are right to do this After all the test scores that we provide have an impact on decisions that affect people's choices and their future plans From an ethical point of view we are obligated to get it right
