Abstract: Language and its importance: Language is an intangible concept. It is composed of various dialects. Due to the large number of dialects within a single language, standard form is hardly ever used by speakers. For instance, despite Hindi being our mother tongue, we hardly use it. Every time, converse in various tongues. For some students, learning English as a foreign language (EFL) can be quite difficult. Understanding the language they learn can sometimes be difficult for them because of their mother tongue. More or less intrusion from their mother tongue influences the language learning of EFL learners. The objectives of this study are to determine

a) The different level of MTI (mother tongue influence) and its varied impact on speaking (English).

b) The impact of the learner's mother tongue on their ability to learn English; and b) the english learners has difficulties learning English as a foreign language.

Tariq Rahman has very beautifully supported this view in the following lines: According to modern linguistic view, the standard variety of a language is also a dialect. As you will observe, dialects are real in the sense that people actually speak them. The language is an abstraction because nobody speaks it. Everybody speaks a dialect. If someone speaks what we call the 'standard language', even that is a dialect of the abstract entity called the 'language'. (Rahman, 2010:144)

Key Words: Dialects, Language, Mother tongue.

INTRODUCTION:

What is Mother Tongue Influence?

Our mother tongue is the tongue we spoke growing up. Literally, it refers to the language our mother taught us, the one we have used since we were young. According to a proverb, language shifts every ten miles in India. As a result, it is challenging for us to speak with a standard accent because we all speak English differently. Some examples are: 'iskool', 'istudent', 'plezar', 'requesht' and other such words. In fact, I got the idea to write on this topic only after a student told us that he wanted to speak "bhery phluent Englis".

How does it develop?

This issue is brought on by the large number of vernacular-medium schools in India. As a result, the majority of Indians have MTI. Another factor might be the later introduction of English to young children. According to studies, kids who start learning a second language while they're young progress more quickly. When a child learns something later in life, it becomes more challenging because by that time, the child has already internalised the sounds of his or her native tongue and applies those sounds to English. This is where the difficulty begins. Finally, a lack of exposure to English may also be the cause.

Mother Tongue Influence's Effects:

People enjoy making fun of folks who have a loud MTI while they speak. People who speak English with MTI are aware that they speak incorrectly, hence doing so is wrong. They avoid speaking any English since they are aware that it will make people laugh at them.
