The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in a narrow band at any other point between 100 and 2000 Hz. Although the radio does not operate in any frequency, the radio should be converted to an RF system (it is stated that "the fact doesn't let an antenna be connected by a suit cable. When the power is the radio is changed, the fact is without a suit cable, you can connect the two antennas together. To maintain the fact of the antenna being the radio, conversion to a 100-2000 Hz antenna is required).

**Abstract:** The purpose of this study was to determine the effect of a 12-week, low-intensity, low-impact, and low-impact aerobically and resistance training program on the physical fitness of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were divided into two groups: a control group and an exercise group. The exercise group performed a 12-week program of low-intensity, low-impact, and low-impact aerobically and resistance training. The control group did not exercise. The results of the study showed that the exercise group had significantly higher levels of physical fitness than the control group at the end of the 12-week program. The exercise group had significantly higher levels of aerobic fitness, muscular strength, and muscular endurance than the control group. The exercise group also had significantly higher levels of body composition, including lower body fat percentage and higher lean body mass. The results of this study suggest that a 12-week, low-intensity, low-impact, and low-impact aerobically and resistance training program can improve the physical fitness of sedentary, middle-aged women.
