**in Medieval Britain (AD 1000–1500)** Peter J. Brown,2023-08-21 When high magnitude meteorological hazards impact vulnerable human populations disasters are the inevitable consequence Through archaeological and historical evidence this book investigates how these sudden and unpredictable events affected British medieval populations AD 1000 1500 Medieval society understood disasters in a practical sense and took steps to minimise risk by constructing flood defences and reinforcing structures damaged by storms At the same time natural hazards were widely interpreted through a framework of

religious and superstitious beliefs and a wide variety of measures were followed to secure protection against the dangers of the natural world Disasters therefore were interpreted through a duality of understanding in which their occurrence could be the result of spiritual or superstitious triggers but practical solutions were a key component in mitigating their tangible impacts In evaluating this duality this book focuses on specific case studies and considers both their diverse historical contexts as well as their consequences for society against the backdrop of significant demographic and climatic change as a result of the Black Death and the transition to the Little Ice Age *Harper's Bazaar* ,1906 **Michael Moss on Archives** Julie Mcleod,Andrew Prescott,Susan Stuart,David Thomas,2023-11-17 Michael Moss on Archives brings together selected outputs from an internationally renowned archival scholar who explored the theory and practice of archives and records management Comprising a selection of 11 of Moss most significant archival writings the book demonstrates the development of his thinking in archival theory and practice over the past 20 years Michael Moss was a towering figure in modern archival writing and was able to push the boundaries of the discipline notably with his analysis of how modern governments create records and his speculations about the future of the archive in the digital world Bringing together in one place Moss most significant writings alongside a comprehensive bibliography this book documents a significant contribution to British and international archival theory and practice Each essay is preceded by a critical introduction written by a leading archival scholar assessing the piece and setting it in a wider archival or historical context while an overall introduction by the editors provides biographical information and describes the development of Michael s archival thinking Michael Moss on Archives will be of interest to scholars and students engaged in the study of archival science library and information science history digital humanities and media studies It should also be of interest to professionals who work in archives and records management *Harper's New Monthly Magazine* ,1881 **Index to Harper's New Monthly Magazine** ,1881

*Apocalyptic Ecologies* Shannon Gayk,2024-12-06 A meditative reflection on what medieval disaster writing can teach us about how to respond to the climate emergency When a series of ecological disasters swept medieval England writers turned to religious storytelling for precedents Their depictions of biblical floods fires storms droughts and plagues reveal an unsettled relationship to the natural world at once unchanging and bafflingly unpredictable In *Apocalyptic Ecologies* Shannon Gayk traces representations of environmental calamities through medieval plays sermons and poetry such as *Cleanness* and *Piers Plowman* In premodern disaster writing she recovers a vision of environmental flourishing that could inspire new forms of ecological care today a truly apocalyptic sensibility capable of seeing in every ending every emergency a new beginning waiting to emerge
