Economic Essays Charles Jesse Bullock,1968      *Essays in Economics: Theories, facts, and policies* Wassily Leontief,1977  
Essays in economics And Other Cheerful Themes S. Subramanian,2014-08-28 Essays in Economics and Other Cheerful Themes is a collection of pieces on economy polity and society written by a social scientist over a number of years The book addresses conceptual and empirical issues in development at both national and global levels The philosophical bases of these issues are sought to be addressed in relatively non technical and accessible terms The book also makes space for essays that deal with less solemn phenomena such as cricket film the conduct of academic institutions and the esoteric excesses of scholarly writing in the social sciences and humanities The book is something of a professional economist s ramble through territory that is both familiar and important to him but undertaken in a spirit of some leisureliness which the author hopes will attract a readership beyond that solely of fellow professionals Written primarily with the non specialist reader in mind these essays aim to be of interest to younger students policy makers and involved and interested lay citizens      Essays in Economics Leon MacLaren,1949      **Essays in Economics** James Tobin,1971      **Answers Plans to a Level Economics Essay Question** Kim Lian Lim,Jeanne,1993      **Essays on Economics, Government and the Environment** Natalie Jean Tawil,1996      **Economic Essays** David Ricardo,Edward Carter Kersey Gonner,1970      **Essays on economics and public policy** ,19??      *Economic Essays and Addresses* Arthur Cecil Pigou,Sir Dennis Holme Robertson,1931      **Three Essays in Economics** Andrei Karavaev,2008      *Essays in Economics* ,1955      Three Essays in Economics Ran Shao,2011 This dissertation presents three essays in economics Firstly I study the problem of allocating an indivisible good between two agents under incomplete information I provide a characterization of mechanisms that maximize the sum of the expected utilities of the agents among all feasible strategy proof mechanisms Any optimal mechanism must be a convex combination of two fixed price mechanisms and two option mechanisms Secondly I study the problem of allocating a non excludable public good between two agents under incomplete information An equal cost sharing mechanism which maximizes the sum of the expected utilities of the agents among all feasible strategy proof mechanisms is proved to be optimal Under the equal cost sharing mechanism when the built cost is low the public good is provided whenever one of the agents is willing to fund it at half cost when the cost is high the public good is provided only if both agents are willing to fund it Thirdly I analyze the problem of matching two heterogeneous populations If the payoff from a match exhibits complementarities it is well known that absent any friction positive assortative matching is optimal Coarse matching refers to a situation in which the populations into a finite number of classes then randomly matched within these classes The focus of this essay is the performance of coarse matching schemes with a finite number of classes The main results of this essay are the following ones

First assuming a multiplicative match payoff function I derive a lower bound on the performance of  $n$  class coarse matching under mild conditions on the distributions of agents characteristics Second I prove that this result generalizes to a large class of match payoff functions Third I show that these results are applicable to a broad class of applications including a monopoly pricing problem with incomplete information as well as to a cost sharing problem with incomplete information In these problems standard models predict that optimal contracts sort types completely The third result implies that a monopolist can capture a large fraction of the second best profits by offering pooling contracts with a small number of qualities
