Faculty Of Management Tut 2016:

Managing Human Resources Ingrid L. Potgieter, Nadia Ferreira, 2022-09-01 This book volume crafts an exciting original account on the changes and requirements on managing human resources within the context of the new normal. Chapters in this book report on current research on the key constructs and processes underlying the management of human resources both on an organisational strategic level as well as an individual employee level. Chapters compare current research trends in terms of future potential directions for the management of human resources within the context of the new normal. The book also critically evaluates the relevance, applicability and utility of the research findings and theoretical premises in various classical current and potential emerging issues for research and practice in the smart digital technological world of work for human resource management. This volume approaches the concept of managing human resources with the new normal working context from a number of different angles. The authors have categorized them as conceptualizing human resource management in the context of the new normal. Part I the critical issues in understanding the dynamics of strategic human resources management. Part II critical issues in understanding the impact of the new normal on the psychology of employees. Part III and the impact of the new normal on individuals with special needs. Part IV. The book ends in Part V of the volume with an integrated reflection and conclusion on emerging issues for research and practice. The primary audience for this book volume is advanced undergraduate and postgraduate students in human resource management as well as scholars in both academic and new normal working contexts. Human resource management practitioners will also have an interest in this book volume. Understanding and mitigating cyberfraud in Africa Oluwatoyin E. Akinbowale, Mariann P. Mashigo, Mulatu F.

Zerihun, 2024-06-30 The book covers the overview of cyberfraud and the associated global statistics. It demonstrates practicable techniques that financial institutions can employ to make effective decisions geared towards cyberfraud mitigation. Furthermore, the book contains some emerging technologies such as information and communication technologies, ICT forensic accounting, big data technologies, tools and analytics employed in fraud mitigation. In addition, it highlights the implementation of some techniques such as the fuzzy analytical hierarchy process (FAHP) and system thinking approach to address information and security challenges. The book combines a case study, empirical findings, a systematic literature review, and theoretical and conceptual concepts to provide practicable solutions to mitigate cyberfraud. The major contributions of this book include the demonstration of digital and emerging techniques such as forensic accounting for cyber fraud mitigation. It also provides in-depth statistics about cyber fraud, its causes, its threat actors, practicable mitigation solutions, and the application of a theoretical framework for fraud profiling and mitigation. Promoting sustainable local economic development initiatives

Marius Venter, 2022 This book endeavours to outline case studies that promote sustainable Local Economic Development (LED) initiatives. It is generally believed that local governments are the foot soldiers of LED. However, this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives. The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways. The book is an essential part of this sequence of ideas, development and action at a critical time for strategic action directed at a sustainable future. It showcases case studies and responses to the impacts of globalisation as a bridge between urban, rural and institutional action and reveals avenues for local government leadership in communities, research, student engagement and wider interactions. *ECIE 2017 12th European Conference on Innovation and Entrepreneurship*

Socio-ecological-economic reflections on the impacts of COVID-19 in Africa Willie Chinyamurindi, Philani

Moyo, 2025-02-28 This scholarly book magnifies reflections from young scientists in South Africa, Africa and beyond around the COVID-19 pandemic. With contributions by upcoming scientists, this scholarly book provides a synopsis of socio-ecological-economic views on the impact of COVID-19. Through its chapters, the book takes a multi-disciplinary approach to reflecting on what it was like to be a scientist during the COVID-19 pandemic.
