Global University Rankings T. Erkkilä, 2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe. The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies, disciplinary traditions and higher education institutions. The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education. The rankings have portrayed European academic institutions in a varying light. There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries. The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe.

University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases, methodological issues, societal impact and policy implications providing readers with a deep understanding of these controversial comparators. The authors propose that university rankings are misused by policymakers and institutional leaders alike. They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys' assessment of their status. The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings. While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself. It is a welcome contribution to an often highly charged debate. Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties.

University Rankings, Diversity, and the New Landscape of Higher Education, 2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector

University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s

higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia

of the international legal field to reveal some of the patterns of difference dominance and disruption that belie international law's claim to universality Pulling back the curtain on the divisible college of international lawyers Anthea Roberts shows how international lawyers in different states regions and geopolitical groupings are often subject to distinct incoming influences and outgoing spheres of influence in ways that reflect and reinforce differences in how they understand and approach international law These divisions manifest themselves in contemporary controversies such as debates about Crimea and the South China Sea Not all approaches to international law are created equal however Using case studies and visual representations the author demonstrates how actors and materials from some states and groups have come to dominate certain transnational flows and forums in ways that make them disproportionately influential in constructing the international This point holds true for Western actors materials and approaches in general and for Anglo American and sometimes French ones in particular However these patterns are set for disruption As the world moves past an era of Western dominance and toward greater multipolarity it is imperative for international lawyers to understand the perspectives and approaches of those coming from diverse backgrounds By taking readers on a comparative tour of different international law academics and textbooks the author encourages them to see the world through the eyes of others an essential skill in this fast changing world of shifting power dynamics and rising nationalism A Guide to Studying and Living in Britain Kris

Rao, 2014-02-21 Every year more than 270 000 students from all around the world come to study in the UK and the number is growing by 10 per cent a year At present most students coming to the UK have to rely on information from their friends and brief leaflets and booklets supplied by universities This indispensable guide tells students all they need to know about Britain's higher education system the application process funding immigration controls health service accommodation study methods and employment opportunities as well as university life British customs and habits and lots of other information on day to day living in the UK *The Research Impact Agenda* Martyna Śliwa, Neil Kellard, 2021-11-11 This book contributes to the growing body of work addressing the processes and consequences of national governments' audits of the performance of higher education institutions HEIs in different countries The book discusses one recent area of focus within these audits

namely the measurement of universities societal and economic impact The Research Impact Agenda offers a problematisation of the research impact agenda especially in relation to the impact generated by academics based in schools of business and management It scrutinises the often unintended but nevertheless significant consequences of this agenda for individuals and higher education institutions such as the reproduction of existing inequalities in academia and the crowding out of other key activities of business schools It puts forward a range of recommendations for researchers policymakers university and business school leaders and individual academics The book will be of interest to a wide range of readers regardless of their formal position organisational affiliation or career stage who consider it important to reduce and remove inequalities and inequities within the HE sector and to make universities and business schools more inclusive The readers will benefit from the opportunity to engage in reflection aimed at transforming the current framing delivery and assessment of business and management research impact *EBOOK: Gender and the Changing Face of Higher Education: A Feminized Future?* Carole Leathwood, Barbara Read, 2008-12-16

A notable feature of higher education in many countries over the last few decades has been the dramatic rise in the proportion of female students Women now outnumber men as undergraduate students in the majority of OECD countries fuelling concerns that men are deserting degree level study as women overtake them both numerically and in terms of levels of achievement The assertion is that higher education is becoming increasingly feminized reflecting similar claims in relation to schooling and the labour market At the same time there are persistent concerns about degree standards with allegations of dumbing down This raises questions about whether the higher education system to which more women have gained access is now of less value both intrinsically and in terms of labour market outcomes than previously This ground breaking book examines these issues in relation to higher education in the UK and globally It provides a thorough analysis of debates about feminization asking To what extent do patterns of participation continue to reflect and re construct wider social inequalities of gender social class and ethnicity How far has a numerical increase in women students challenged the cultures curriculum and practices of the university What are the implications for women men and the future of higher education Drawing on international and national data theory and research *Gender and the Changing Face of Higher Education* provides an accessible but nuanced discussion of the feminization of higher education for postgraduates policy makers and academics working in the field *World University Rankings and the Future of Higher Education*
