and situational leadership Victor Rhodd OD and Employee Development Consultant New York Power Authority It reads like a combination diary and practitioners tool kit by weaving in and out of personal views and some really good case examples George Truel Author and OD Practitioner If you are going to read this book and I strongly recommend you do Beckers book is not a theoretical work It is about the experience of OD about the essential conditions that must be adhered to in order to do it professionally and about some of the mechanisms and guideposts that can be helpful in navigating through the huge complexity of a large scale organizational change it is worth reading Robin Stuart Kotze PhD International Management Consultant and Professor

Organisations private and public operate in an increasingly uncertain landscape in which they are confronted with challenges they might not be ready to face They desperately need the engaged minds of their workforces The evidence however suggests that for the most part they don t have that There is an urgent need to address the high cost of low trust and employee disengagement Revealing a new approach centred on redefining what we mean by management and business and that it is a collective form of learning that binds them together and facilitates sustained high performance Donal Carroll examines high performing organisations to uncover how they have built trust managed value adopted new types of business model and successfully engaged in collective learning The new management model is about retaining control by giving it away more accountable self management a new professionalism and about framing organisation as the basic unit of purpose rather than management itself Next new business models are examined more suited to complex internet enabled markets that allow greater choice but which need organizational alertness to what works Thirdly learning is considered with a focus on moving from organisational learning to productive interference sustaining action based learning that thrives on mess in an open trusting democratic climate The author provides tools and techniques enabling organisations to measure creativity and innovation and to undertake self assessment of their position in relation to the new management business and learning models as well as guidance on energising change initiatives self leading and accountability Practicing managers change leaders coaches and consultants as well as business scholars and researchers will find much that is useful in this book
