Pedagogic Research in Geography Higher Education Martin Haigh, Debby Cotton, Tim Hall, 2017-10-02. There are many books about teaching in Geography but this is the first dealing specifically with Pedagogic Research, its methods and practices. Pedagogy research concerns the processes of learning and the development of learners. It is a learner-centred activity that aims to evaluate and improve the ways that students learn and learn to manage, control and comprehend their own learning processes, first as Geographers in Higher Education but equally as future educated citizens. This book collects together some key research papers from the Journal of Geography in Higher Education. They concern original research and critical perspectives on how Geographers learn, critical evaluations of both new and traditional frameworks and methods used for Pedagogic research in Geography and some case studies on the promotion of self-authorship, learner autonomy in key Geography Higher Education contexts such as fieldwork and undergraduate project work. This book is a compilation of articles from various issues of the Journal of Geography in Higher Education. **Biodiversity in Land-inland Water**

The Sustainability Grand Challenge Michael Gibbert, Liisa

Välikangas, Marijane Luistro-Jonsson, 2020-11-26. How do universities tackle wicked sustainability challenges faced by society? The Wicked Learning Workbook is a toolkit for setting up and running an interdisciplinary master level course in the context of real world problems such as food waste and loss. The book offers a new pedagogical approach that we call wicked because it is unorthodox, ambitious and tackles complex problems that won't go away. The pedagogy is also international at the course level rather than the conventional exchange semester, enabling institutions to embed international approaches to their core

teaching The Wicked Learning Workbook speaks directly to academics who are looking for solutions that provide stimuli for research and teaching while giving students an innovative international learning experience The approach develops student understanding of the UN Sustainable Development Goals as broad scale societal issues which are difficult if not impossible to solve An important outcome of this approach is the laboratory style classroom that creates opportunities for faculty students and companies to co create solutions that are immediately implementable The resulting methodology is based on industry university collaboration such as IKEA and Nestl The methodology is of interest to corporate leaders pursuing sustainability goals and business transformation Achieving sustainability requires cross boundary cross disciplinary experimental approaches that allow for scalability Wicked problems can only be tackled with wicked solution approaches **SSC CHSL**
