Walter T. Grondzik

Hvac Design Manual:

Air-conditioning System Design Manual Walter T. Grondzik, 2007 The Air Conditioning Manual assists entry level engineers in the design of air conditioning systems It is also usable in conjunction with fundamental HVAC R resource material as a senior or graduate level text for a university course in HVAC system design The manual was written to fill the void between theory and practice to bridge the gap between real world design practices and the theoretical calculations and analytical procedures or on the design of components This second edition represents an update and revision of the manual It now features the use of SI units throughout updated references and the editing of many illustrations Helps engineers quickly come up with a design solution to a required air conditioning system Includes issues from comfort to cooling load calculations New sections on Green HVAC systems deal with hot topic of sustainable buildings

HVAC Design Manual for Hospitals and Clinics, 2003-01-01 This manual provides those involved in the design installation and commissioning of HVAC systems for hospitals with a comprehensive reference source for their work The text covers environmental comfort infection control energy conservation life safety and operation and maintenance providing design strategies known to meet applicable standards and guidelines It also contains information on disaster planning and provides best practice recommendations on temperature humidity air exchange and pressure requirements for various types of rooms found in hospitals A chapter on terminology begins to define several medical terms for the design engineer

HVAC Design Manual for Hospitals and Clinics, 2012 Provides in depth design recommendations and proven cost effective and reliable solutions for health care HVAC design that provide low maintenance cost and high reliability based on best practices from consulting and hospital engineers with decades of experience in the design construction and operation of health care facilities

HVAC Design Manual for Hospitals and Clinics ASHRAE (Firm), 2013 Health care HVAC systems serve facilities in which the population is uniquely vulnerable and exposed to an elevated risk of health fire and safety hazard These heavily regulated high stakes facilities undergo continuous maintenance verification inspection and recertification typically operate 24 7 and are owner occupied for long life The HVAC systems in health care facilities must be carefully designed to be installed operated and maintained in coordination with specialized buildings services including emergency and normal power plumbing and medical gas systems automatic transport fire protections and a myriad of IT systems all within a limited building envelope
