The Carbon Buster's Home Energy Handbook Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology The Carbon Buster's Home Energy Handbook describes how to achieve this goal in the residential field The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook It provides answers to questions such as Which measure is more effective putting solar panels on your roof or buying a hybrid car Where do I need to invest first in high efficiency shower heads or solar tubes Is a 500 fridge that uses 800 kWh of power per year a good buy The book allows individuals to quickly and accurately assess

which products are a good deal and which aren't. It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns yielding results that are often surprising. The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol. At the same time, readers implementing the recommendations will save an average of 15,000 in energy costs over the next five years.

The Handholder's Handbook Rosette Teitel, 2001. Annotation: According to the Alzheimer's Association, one in ten persons over sixty-five and nearly half of those over eighty-five have Alzheimer's disease. Today 4 million Americans have Alzheimer's disease. In a national survey, 19 million Americans said they have a family member with the ailment and 37 million said they knew someone who had it. But when Rosette Teitel found herself in the role of caregiver to her ailing husband, she could find no books that answered her practical needs: How do you give a 170-pound man a shower? How do you pick him up when he falls? What should you anticipate as the disease progresses? What support networks are available? When is it time to consider a nursing home and how do you find one? While many Alzheimer's disease books focus on the disease and the patient, Teitel draws on her own experience as well as that of a clinical psychologist, a coordinator of an Alzheimer's program at a community center, members of the Alzheimer's Foundation, a research psychologist, an elder law attorney, and a neurologist to tackle subjects rarely dealt with in other self-help books. Teitel covers topics such as managing the expenses of long-term care through Medicaid, estate planning, and preparing for the patient's death and the loss of someone whose daily survival has been at the center of one's existence. The chapters deal with background information on diagnosis, treatment, and the progression of the disease; the physical and emotional changes and resources involved with the day-to-day caregiving; support networks; nursing homes; finances; death of the patient; grief, mourning, and life after the patient's death; and interviews with children caring for parents with Alzheimer's disease. In addition, Teitel provides a helpful list of frequently asked questions, scheduling and memory aids, and websites where readers can find resources.
