## **Java Message Service Richard Monson-Haefel:**

**Java Message Service** David A Chappell, Richard Monson-Haefel, 2000-12-04 This book is a thorough introduction to Java Message Service JMS the standard Java application program interface API from Sun Microsystems that supports the formal communication known as messaging between computers in a network JMS provides a common interface to standard messaging protocols and to special messaging services in support of Java programs The messages exchange crucial data between computers rather than between users information such as event notification and service requests Messaging is often used to coordinate programs in dissimilar systems or written in different programming languages Using the JMS interface a programmer can invoke the messaging services of IBM s MQSeries Progress Software s SonicMQ and other popular messaging product vendors In addition JMS supports messages that contain serialized Java objects and messages that contain Extensible Markup Language XML pages Messaging is a powerful new paradigm that makes it easier to uncouple different parts of an enterprise application Messaging clients work by sending messages to a message server which is responsible for delivering the messages to their destination Message delivery is asynchronous meaning that the client can continue working without waiting for the message to be delivered The contents of the message can be anything from a simple text string to a serialized Java object or an XML document Java Message Service shows how to build applications using the point to point and publish and subscribe models how to use features like transactions and durable subscriptions to make an application reliable and how to use messaging within Enterprise JavaBeans It also introduces a new EJB type the MessageDrivenBean that is part of EJB 2.0 and discusses integration of messaging into J2EE

**Java Message Service** Mark Richards, Richard Monson-Haefel, David A Chappell, 2009-05-19 Java Message Service Second Edition is a thorough introduction to the standard API that supports messaging the software to software exchange of crucial data among network computers You ll learn how JMS can help you solve many architectural challenges such as integrating dissimilar systems and applications increasing scalability eliminating system bottlenecks supporting concurrent processing and promoting flexibility and agility Updated for JMS 1.1 this second edition also explains how this vendor agnostic specification will help you write messaging based applications using IBM s MQ Progress Software s SonicMQ ActiveMQ and many other proprietary messaging services With Java Message Service you will Build applications using point to point and publish and subscribe messaging models Use features such as transactions and durable subscriptions to make an application reliable Implement messaging within Enterprise JavaBeans EJB using message driven beans Use JMS with RESTful applications and with the Spring application framework Messaging is a powerful paradigm that makes it easier to uncouple different parts of an enterprise application Java Message Service Second Edition will quickly teach you how to use the key technology that lies behind it
