

With 2850R **EVEN-HEAT™** with Auto

Moisture Sensing Plus

- When the Cycle Selector Control (Timer) is set to **NORMAL DRY** ★, and has run through a full drying cycle, you can feel the dried clothes and determine if they are more damp than you would like.

- If the load is too damp, you can use the **TIMED DRY** cycle to dry the clothes further. The next time you do a similar load, move the timer toward **MORE DRY**.

- If the load is overdried at the end of the cycle, you can move the timer toward **DAMP DRY** the next time you do a similar load.

NOTE: For very small loads (3-4 garments) use the **TIMED DRY** cycle for best results. You can use the **FABRIC CARE/ Temperature Control** with a setting that is appropriate for your load.

When to Use **DAMP DRY**

for your **Benefit**

Selecting **DAMP DRY** helps shorten drying times for items you would normally hang dry.

Some fabrics will shrink if dried in a clothes dryer. Selecting **DAMP DRY** gives you the benefit of electronic moisture sensing. Clothes are dried with heat for a brief time so most of the moisture is removed. However, the drying cycle stops while the clothes are still damp to prevent overdrying. As a result, fabrics retain the proper amount of moisture so they will not shrink.

When to Use the **TUMBLE FREE™** Heated Dryer Rack

for your **Benefit**

The dryer rack gives you concentrated heat for efficient and uniform drying. It also reduces noise when drying items that have buckles. Use the heated drying rack with the **TIMED DRY** cycle only. This allows you to machine dry items for a specific length of time without tumbling.

FABRIC CARE/TEMPERATURE

CONTROL

for your **Benefit**

Proper use of this control helps ensure that fabrics are dried at the right temperature for maximum life.

Use this control to select the drying temperature that matches the fabrics in your load.

- For hand washed or delicate items, select the **ULTRA DELICATE** setting. This setting will not exceed a maximum drying temperature of 140°F.

NOTE: Not all hand washable garments can be dried in a dryer. Check the care label on all hand washable garments to determine whether or not they can be machine dried.

- For a description of garment types and temperature settings, refer to your Owner's Manual.

"Smart," Temperature-Sensing **COOL**

DOWN Period

Once the selected level of dryness is reached, the dryer goes into a cool down period lasting 1-10 minutes. Unlike other dryers which provide a fixed 10-minute cool down, this "smart" cool down period is based on the temperature of the clothes in your load and varies the time accordingly.

- For small loads or loads that are dried at a lower temperature, the cool down period will be reduced to as low as one minute.
- For large loads or loads that are dried at a high temperature, the cool down period will be closer to ten minutes.

TOTAL CARE™ SYSTEM

The exclusive **TOTAL CARE™ SYSTEM** combines the **KING SIZE™** load capacity, **EVEN-HEAT™**, **WRINKLE GUARD®** II, and the **TUMBLE FREE™** Heated Dryer Rack to ensure total drying care for any type of fabric and load size.

Kenmore He2 Manual

Terry C. Jones

Kenmore He2 Manual:

Unveiling the Energy of Verbal Art: An Mental Sojourn through **Kenmore He2 Manual**

In a world inundated with monitors and the cacophony of immediate conversation, the profound power and emotional resonance of verbal artistry usually fade into obscurity, eclipsed by the regular barrage of sound and distractions.
