Africa's Natural Resources and Underdevelopment Kwamina Panford, 2017-02-02. This book explores how African countries can convert their natural resources, particularly oil and gas, into sustainable development assets. Using Ghana, one of the continent's newest oil-producing countries, as a lens, it examines the resource curse faced by other producers such as Nigeria, Angola, and Equatorial Guinea, and demonstrates how mismanagement in those countries can provide valuable lessons for new oil producers in Africa and elsewhere. Relying on a broad range of fieldwork and policymaking experience, Panford suggests practical measures for resource-rich developing countries to transform natural resources into valuable assets that can help create jobs, boost human resources, and improve living and working conditions in Ghana, in particular. He suggests fiscal, legal, and environmental antidotes to resource mismanagement, which he identifies as the major obstacle to socioeconomic development in countries that have historically relied on natural resources.

Educating for Durable Solutions Christine Monaghan, 2021-04-08. What is education for an unknowable future? In *Educating for Durable Solutions*, Christine Monaghan explores how refugees and policymakers have answered this question over time by reconstructing the contemporary history of education in Kenya's Dadaab and Kakuma refugee camps. Through oral histories and archival research, Monaghan shows how, since the founding of both camps in 1991, refugees and policymakers have conceptualized, developed, implemented, and changed refugee education programs. She also shows why and how, despite these changes, real challenges persist in refugee education in Dadaab, Kakuma, and other camps throughout the world: these include high numbers of out-of-school children and youth, high student-to-teacher ratios, unpredictable funding, and persistent questions regarding what refugee education is for. The author shifts focus from debates over the impacts of specific policies and programs and explores instead how and why different policies and programs were implemented, whether they led to meaningful changes in the long-standing challenges of refugee education. She finds that when and where real changes occurred, individuals or small groups of refugees and policymakers acted with tremendous agency and as tireless advocates.
