### Part 1: Moon phase observation

Analyze the following sequences of photographs for the moon phase progression for the following questions:

**Question 1:** Is there any visible illumination change in weight? If applicable:

Answer: The light is seen to increase from left to right, which is generally the direction of increasing illumination. There is a slight increase in the amount of light seen from left to right, but the brightness is not.

**Question 2:** For following classification of the moon phase, name the moon phase. Identify the phase, explain the illumination pattern, and name the moon phase.

Image	Phase	Image	Phase

Jessica McCrory Calarco, 2018-02-01 In Negotiating Opportunities Jessica McCrory Calarco argues that the middle class has a negotiated advantage in school Drawing on five years of ethnographic fieldwork Calarco traces that negotiated advantage from its origins at home to its consequences at school Through their parents coaching working class students learn to follow rules and work through problems independently Middle class students learn to challenge rules and request assistance accommodations and attention in excess of what is fair or required Teachers typically grant those requests creating advantages for middle class students Calarco concludes with recommendations advocating against deficit oriented programs that teach middle class behaviors to working class students Those programs ignore the value of working class students resourcefulness respect and responsibility and they do little to prevent middle class families from finding new opportunities to negotiate advantages in school      **Project Earth Science** Geoff Holt, Nancy W.
