M Web Services:

Web, Web-Services, and Database Systems Akmal Chaudhri, Mario Jeckle, Erhard Rahm, Rainer Unland, 2003-07-01
This book constitutes the thoroughly refereed post proceedings of the Web and Database Related Workshops held during the NetObjectDays international conference NODE 2002 in Erfurt Germany in October 2002 The 19 revised full papers presented together with 3 keynote papers were carefully selected during 2 rounds of reviewing and improvement The papers are organized in topical sections on advanced Web services UDDI extensions description and classification of Web services applications based on Web services indexing and accessing Web and XML databases mobile devices and the Internet and XML query languages

Web Services, E-Business, and the Semantic Web Christoph Bussler, Maria E. Orlowska, Jian Yang, 2004-07-26 The 2nd Workshop on Web Services E Business and the Semantic Web WES was held during June 16 17 2003 in conjunction with CAiSE 2003 the 15th International Conference on Advanced Information Systems Engineering The Internet is changing the way businesses operate Organizations are using the Web to deliver their goods and services to find trading partners and to link their existing maybe legacy applications to other applications Web services are rapidly becoming the enabling technology of today s e business and e commerce systems and will soon transform the Web as it is now into a distributed computation and application fra work On the other hand e business as an emerging concept is also impacting software plications the everyday services landscape and the way we do things in almost each domain of our life There is already a body of experience accumulated to demonstrate the difference between just having an online presence and using the Web as a stra gic and functional medium in e business to business interaction B2B as well as marketplaces Finally the emerging Semantic Web paradigm promises to annotate Web artifacts to enable automated reasoning about them When applied to e services the paradigm hopes to provide substantial automation for activities such as discovery invocation assembly and monitoring of e services But much work remains to be done before realizing this vision

Semantic Web Services Dieter Fensel, Federico Michele Facca, Elena Simperl, Ioan Toma, 2011-04-28 A paradigm shift is taking place in computer science one generation ago we learned to abstract from hardware to software now we are abstracting from software to serviceware implemented through service oriented computing Yet ensuring interoperability in open heterogeneous and dynamically changing environments such as the Internet remains a major challenge for actual machine to machine integration Usually significant problems in aligning data processes and protocols appear as soon as a specific piece of functionality is used within a different application context The Semantic Web Services SWS approach is about describing services with metadata on the basis of domain ontologies as a means to enable their automatic location execution combination and use Fensel and his coauthors provide a comprehensive overview of SWS in line with actual industrial practice They introduce the main sociotechnological components that ground the SWS vision like Web Science Service Science and service oriented architectures and several approaches that realize it e g the Web Service Modeling Framework

OWL S and RESTful services The real world relevance is emphasized through a series of case studies from large scale R D projects and a business oriented proposition from the SWS technology provider Seekda Each chapter of the book is structured according to a predefined template covering both theoretical and practical aspects and including walk through examples and hands on exercises Additional learning material is available on the book website www.swsbook.org With its additional features the book is ideally suited as the basis for courses or self study in this field and it may also serve as a reference for researchers looking for a state of the art overview of formalisms methods tools and applications related to SWS

Service Engineering Schahram Dustdar, Fei Li, 2010-10-22 Service engineering is increasingly posing challenges to traditional software engineering methodologies including specification modeling architecture and verification just to name a few On the other hand the latest advancements in software engineering are continuously leveraged in Service Engineering research especially in the design and implementation of service oriented systems Several mutual impacts between service engineering and software engineering could be observed in the last decade and many research efforts have been devoted to the field However in spite of the considerable efforts and significant contributions few have attempted to summarize the research results systematically

Service-Oriented Computing - ICSOC 2007 Bernd Krämer, Kwei-Jay Lin, Priya Narasimhan, 2007-08-30 This book constitutes the refereed proceedings of the Fifth International Conference on Service Oriented Computing ICSOC 2007 The 30 revised full papers and 14 short papers are organized in topical sections on service deployment business process design service discovery quality of service support testing and validation service assembly service properties service modeling SOA composition experience runtime governance and QoS and composite service support

Distributed Applications and Interoperable Systems René Meier, Sotirios Terzis, 2008-05-27 This volume contains the proceedings of DAIS 2008 the 8th IFIP International Conference on Distributed Applications and Interoperable Systems The conference was held in Oslo Norway during June 4-6 2008 as part of the DisCoTec Distributed Object Techniques federated conference in conjunction with the 10th International Conference on Coordination Models and Languages COORDINATION and the 10th IFIP International Conference on Formal Methods for Open Object Based Distributed Systems FMOODS The conference was sponsored by IFIP International Federation for Information Processing and was organized by the IFIP Working Group 6.1 Distributed applications and interoperable systems have become an integral part of everyday living and hence part of the socio economic ecosystem of our human environment

With such pervasive distribution of software systems across a multitude of heterogeneous environments and user domains distributed applications must support seamless provision of services as well as service evolution and adaptability to ensure long term sustainability This support must go beyond the provision of individual services in isolation towards systems in which such services can interoperate and be integrated into the everyday environment catering for the changing needs of their users

Advanced Data Mining and Applications Jie Tang, Irwin King, Ling Chen, Jianyong Wang, 2011-12-02 The two

volume set LNAI 7120 and LNAI 7121 constitutes the refereed proceedings of the 7th International Conference on Advanced Data Mining and Applications ADMA 2011 held in Beijing China in December 2011 The 35 revised full papers and 29 short papers presented together with 3 keynote speeches were carefully reviewed and selected from 191 submissions The papers cover a wide range of topics presenting original research findings in data mining spanning applications algorithms software and systems and applied disciplines
