Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders. **Teacher in Zimbabwe**, 2014

Adaptive Collaborative Management in Forest Landscapes Carol J. Pierce Colfer, Ravi Prabhu, Anne M. Larson, 2021-12-12 This book examines the value of Adaptive Collaborative Management for facilitating learning and collaboration with local communities and beyond, utilising detailed studies of forest landscapes and communities. Many forest management proposals are based on top-down strategies such as the Million Tree Initiative's Forest Landscape Restoration (FLR) and REDD, often neglecting local communities. In the context of the climate crisis, it is imperative that local peoples and communities are an integral part of all decisions relating to resource management. Rather than being seen as beneficiaries or people to be safeguarded, they should be seen as full partners. Adaptive Collaborative Management is an approach which prioritises the rights and roles of communities alongside the need to address the environmental crisis. The volume presents detailed case studies and real-life examples from across the globe, promoting and prioritising the voices of women and scholars and practitioners from the Global South who are often under-represented. Providing concrete examples of ways that a bottom-up approach can function to enhance development sustainably via its practitioners and far beyond the locale in which they initially worked, this volume demonstrates the lasting utility of approaches like Adaptive Collaborative Management that emphasise local control, inclusiveness and local creativity in management. This book will be of great interest to students, scholars and practitioners working in the fields of conservation, forest management, community development and natural resource management and development studies more broadly. The Open Access version of this book is available at www.taylorfrancis.com and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 license. **Nicholls, Montgomery, and Knowles on The Law of Extradition and Mutual Assistance** Clive Nicholls QC, Clive Nicholls, Clare Montgomery QC, Clare Montgomery, Julian B. The Grey Zone Mark Lattimer,Philippe Sands,2018-07-26 The high civilian death toll in modern protracted conflicts such as those in Syria or Iraq indicate the limits of international law in offering protections to civilians at risk A recent

conference of states convened by the International Committee of the Red Cross referred to an institutional vacuum in the area of international humanitarian law implementation Yet both international humanitarian law and the law of human rights establish a series of rights intended to protect civilians But which law or laws apply in a particular situation and what are the obstacles to their implementation How can the law offer greater protections to civilians caught up in new methods of warfare such as drone strikes or targeted by new forms of military organisation such as transnational armed groups Can the implementation gap be filled by the growing use of human rights courts to remedy violations of the laws of armed conflict or are new instruments or mechanisms of civilian legal protection needed This volume brings together contributions from leading academic authorities and legal practitioners on the situation of civilians in the grey zone between human rights and the laws of war The chapters in Part 1 address key contested or boundary issues in defining the rights of civilians or non combatants in today s conflicts Those in Part 2 examine remedies and current mechanisms for redress both at the international and national level and those in Part 3 assess prospects for the development of new mechanisms for addressing violations As military intervention to protect civilians remains contested this volume looks at the potential for developing alternative approaches to the protection of civilians and their rights

Creativity and Captivity Uday Balasundaram, 2021-12-02 Ultimately what really does it mean to be creative How can we see ourselves as participating in the creativity of God for mission All people are creative Sadly however for many creativity is stifled and remains stunted due to several reasons social economic political cultural and even spiritual This study explores how ICMs indigenous cosmopolitan musicians negotiate their creativity amid the liminal spaces they occupy as they share in the creativity of God for mission through their music But what exactly does it mean to share in the creativity of God for mission Contrary to popular notion ICMs evidence that creativity is not merely innovation it is not a psychological metric for measuring human potential it is certainly not the icing on the cake reserved for a few so called creatives or artists Rather theological creativity is participation in the creatio Dei it is theologically prior to mission As a missiological framework creatio Dei is understood here in terms of creative being creative construction design and creative performance Hopefully this book can help clarify and expand our understanding of what it means to be truly creative and thereby with the help of the Creator put into practice
