EDUCATION - PAST,PPRESENT AND FUTURE Dr. K P Agrawal,2024-03-16 Education is the process of learning or the acquisition of knowledge skill values beliefs and habits Education is becoming an important part of every one s life Education was strong in ancient days also The system changed with passage of time such as Vedic Brahmanical Muslim British periods etc Today education is oriented to promote values of an urban competitive consumer society Through the existing education system in the last five decades the country has excelled in different fields and made a mark at the National and International levels There is a need to regulate our education system at different levels from primary to higher education There is also need to remove deficiencies and short comings in our education system All these issues have been covered under nine chapters of the book The Times of India directory and year book including Who's who ,1950-01-01 **Year Book of Education** National Council of Educational Research and Training (India),1961 Innovative Strategies for Accelerated Human Resources Development in South Asia Asian Development Bank,2017-12-01 Significant investments have been made to modernize and improve the provision of education services Strengthening teacher development has been a key component of these investments However programs on teacher development have provided mixed results This report adopts a 360 degree perspective to review the current status of teacher development demand and supply and performance management in five countries from the South Asia region including Bangladesh Nepal and Sri Lanka with limited reference to Bhutan and Maldives It probes beyond teacher in service training and teacher job conditions and investigates systemic and structural issues Continued investment may not be the best option to improve the quality and supply of teachers and so the challenge is how to leverage resources to meet the demand The Journal of Education ,1895 C.I.E. Publications Delhi (India). Central Institute of Education,1960 **Understanding Your Refugee and Immigrant Students** Jeffra Flaitz,2006

Understanding Your Refugee and Immigrant Students is an excellent resource for educators who work with refugees and immigrants. This well researched volume including interviews with students from the profiled countries provides a wealth of information about the specific schooling traditions, practices, circumstances and expectations that follow these individuals to their new homes in North America and influence their learning experience. The author has focused her research on 18 countries that contribute a majority of refugees and immigrants to the United States: Afghanistan, Bosnia Herzegovina, Croatia, the Dominican Republic, Ecuador, El Salvador, Ethiopia, Guatemala, Honduras, India, Iran, Laos, Liberia, Peru, Somalia, Sudan, and the Ukraine. Each country profile features statistics about the country, a historical synopsis, an overview of the country's official education policy, cultural perspectives, and a problem solution section containing classroom strategies. The linguistic systems of the languages featured are also included for teacher reference. Also included is information about teacher student relationships, discipline and class management, and appropriate non verbal communication. This volume provides invaluable insight into refugee and immigrant students' cultural and educational backgrounds and gives instructors the tools to translate this information into effective classroom strategies.
