

Vehicle identification numbers

Modifications are a continuing and unpublicized process in vehicle manufacturing. Since spare parts manuals and lists are compiled on a numerical basis, the individual vehicle numbers are essential to correctly identify the component required.

Vehicle Identification Number (VIN)

This very important identification number is stamped on a plate attached to the left side of the dashboard, just inside the windshield on the driver's side of the vehicle (see illustration). The VIN also appears on the Vehicle Certificate of Title and Registration. It contains information such as where and when the vehicle was manufactured, the model year and the body style.

The vehicle identification number (VIN) is visible from outside the vehicle through the driver's side of the windshield

Chassis number

The chassis number is stamped on the frame under the vehicle, near the right rear shock absorber.

Engine identification number

The engine ID number consists of two parts: a model number and a serial number. On four-cylinder engines, it is located on the right side of the engine in one of two places: 1) on a machined surface at the front corner of the block, just below the number one spark plug (2.6L engine) or 2) at the lower right front corner of block (2.0L and 2.4L engine) (see illustrations). On V6 engines, the ID number is located on a pad at the right side of the block (see illustration).

On 2.6L four-cylinder engines, the identification number is located on a machined surface at the right front corner of the block, just below the cylinder head

Location of the identification number on 2.0L and 2.4L four-cylinder engines

V6 engine ID number location
