Repair and Sales Sector in Belgium European Centre for the Development of Vocational Training, 1994 An international team
of researchers studied the following aspects of training in Belgium s motor vehicle repair and sales sector structure and
characteristics institutional and social context relationship to Belgium s overall labor market changing structural economic
and organizational conditions and training and recruitment and relationship to Belgium s education system Data were
obtained from a review of government social and labor employment statistics and from case studies of the four firms Peugeot
Talbot Volvo Ford and Mercedes Each case study included a general profile of the company its personnel management and
vocational policies and its provisions for continuing ongoing training Belgium s educational system was found to contain at
least four different channels by which individuals can prepare for jobs in the sector Most public private collaborative training
efforts were focused on at risk groups In total training activities within the sector the initiatives taken by motor vehicle
manufacturers played the most important role Training initiatives and policies varied widely by company Collaborations
between different manufacturers appeared to represent a very important option for the future and self study was increasing
in importance Most manufacturers invested in their own training infrastructures however training was also contracted out
