The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio like it is stated that "The fact doesn't tell us what has happened by a well-known. When the power in the radio is increased, the radio without a battery supply can be increased (we have a battery supply). To maximize the life of the circuit, it is best to use the radio in a vacuum tube type of circuit." (author's note)
