**Federal Sentencing Guidelines Manual, 2009** United States Sentencing Commission, United States Sentencing Commission Staff, 2009-12-05      **Handbook on Crime and Technology** Don Hummer, James M. Byrne, 2023-03-02

Examining the consequences of technology driven lifestyles for both crime commission and victimization this comprehensive Handbook provides an overview of a broad array of techno crimes as well as exploring critical issues concerning the criminal justice system's response to technology facilitated criminal activity      The Changing Role of Criminal Law in Controlling Corporate Behavior James M. Anderson, Ivan Waggoner, 2014-12-09 What should be the role of the criminal law in controlling corporate behavior and how can the execution of that role be improved On the one hand corporations have enormous power and when a corporation causes harm there is a natural instinct to apply criminal sanctions society's most serious expression of moral disapproval In the wake of a harm in which a corporation had a prominent role there are often calls for an increased use of the criminal law to tame corporate excesses On the other hand criminal liability has historically usually required criminal intent a concept that applies oddly to a legal construction such as a corporation And more recently critics have decried what they have termed the overcriminalization of corporate behavior suggesting that there has been an overreliance on the use of criminal law in this context To provide guidance to policymakers on the proper role of criminal sanctions in this context RAND Corporation researchers 1 measure the current use of criminal sanctions in controlling corporate behavior 2 describe how the current regime developed and 3 offer suggestions about how the use of criminal sanctions to control corporate behavior might be improved Unedited summary from book cover      *Paying for the Past* Richard S. Frase, Julian V. Roberts, 2019 All modern sentencing systems in the US and beyond consider the offender's prior record to be an important determinant of the form and severity of punishment for subsequent offences Repeat offenders receive harsher punishments than first offenders and offenders with longer criminal records are punished more severely than those with shorter records Yet the vast literature on sentencing policy law and practice has generally overlooked the issue of prior convictions even though this is the most important sentencing factor after the seriousness of the crime In *Paying for the Past* Richard S Frase and Julian V Roberts provide a critical and systematic examination of current prior record enhancements under sentencing guidelines across the US Drawing on empirical data and analyses of guidelines from a number of jurisdictions they illustrate different approaches to prior record enhancements and the differing outcomes of those approaches Roberts and Frase demonstrate that most prior record enhancements generate a range of adverse outcomes at sentencing Further the pervasive justifications for prior record enhancement such as the repeat offender's assumed higher risk of reoffending or greater culpability are uncertain and have rarely been subjected to critical appraisal The punitive sentencing premiums for repeat offenders prescribed by US guidelines cannot be justified on grounds of prevention or retribution Shining a light on a

neglected but critically important topic Paying for the Past examines the costs of prior record enhancements for repeat offenders and offers model guidelines to help reduce racial disparities and reallocate criminal justice resources for jurisdictions who use sentence enhancements

The Criminalization of European Cartel Enforcement Peter Whelan, 2014-08-07 Cartel activity is prohibited under EU law by virtue of Article 101 1 of the Treaty on the Functioning of the European Union Firms that violate this provision face severe punishment from those entities responsible for enforcing EU competition law the European Commission the national competition authorities and the national courts Stiff fines are regularly imposed on firms by these entities such firm focused punishment is an established feature of the antitrust enforcement landscape within the EU In recent years however focus has also been placed on the individuals within the firms responsible for the cartel activity It is increasingly recognized that punishment for cartel activity should be individual focused as well as firm focused Accordingly a growing tendency to criminalize cartel activity can be observed in the EU Member States The existence of such criminal sanctions within the EU presents a number of crucial challenges that need to be met if the underlying enforcement objectives are to be achieved in practice without violating prevailing legal norms For a start given the severe consequences of a custodial sentence the employment of criminal antitrust punishment must be justifiable in principle one must have a robust normative framework rationalizing the existence of criminal cartel sanctions Second for it to be legitimate antitrust criminalization should only occur in a manner that respects the mandatory legalities applicable to the European jurisdiction in question These include the due process rights of the accused and the principle of legal certainty Finally the correct practical measures such as a criminal leniency policy and a correctly defined criminal cartel offence need to be in place in order to ensure that the employment of criminal antitrust punishment actually achieves its aims while maintaining its legitimacy These three particular challenges can be conceptualized respectively as the theoretical legal and practical challenges of European antitrust criminalization This book analyses these three crucial challenges so that the complexity of the process of European antitrust criminalization can be understood more accurately In doing so this book acknowledges that the three challenges should not be considered in isolation In fact there is a dynamic relationship between the theoretical legal and practical challenges of European antitrust criminalization and an effective antitrust criminalization policy is one which recognizes and respects this complex interaction

Cooper,2010-04-06 With the economic crisis that began in 2008 a long standing trend toward increased regulation is becoming a flood The clamor for improved enterprise risk management and the complexity of multinational compliance present executives with a dramatically new array of challenges Governance should offer solutions but it is clear that yesterday s governance practices aren t up to the task In both design and implementation they are too disconnected and incomplete to fully address our complex compliance and risk management puzzle Executives get only fragmented views of their true business performance and inefficiencies drive up costs The consequences of inadequate governance were demonstrated in the economic meltdown of 2008 As the world struggles to recover from that crisis business is now faced with a confusing array of evolving regulations the challenge of managing compliance across multinational organizations and a new imperative for risk management that is coordinated across the enterprise It s clear that yesterday s governance practices don t meet today s need for centralized controls integrated compliance and risk management and greater transparency The need for organizations to change and change now is clear Under Control captures decades of business governance experience from many of the leading authorities at CA Inc This book sets out not only to explain the essential challenges of effective business governance but to help you build solutions for your organization based on lessons learned at CA from its customers and in its own corporate structure From governing the organization s policies as a whole instead of in silos to a department by department look at the role and impact of governance to governing your green initiatives to the role of the board of directors to the importance of risk management this book lays out some of the strategies and processes that may help your organization manage its risk and regulatory requirements It is clear that the governance standards in the past were inadequate and that risks have not been properly assessed or understood This book is a first step in solving this problem so that your organization is prepared and able to respond and thrive in today s rapidly evolving environment Under Control is the first book published in the new CAPress imprint a joint publishing program between Apress and CA Inc One of the defining factors of the first decade of the 21st century has been the increase of regulation and governance To explain these trends and the various best practices for ensuring governance enterprise IT management solutions provider CA Inc enlisted more than a dozen subject matter experts from its ranks to contribute content The resulting book explores the need for broad governance different areas where governance is important and various ways for organizations to manage and implement compliance including IT governance project portfolio management information governance and sustainability management The book while largely vendor neutral draws on CA s experience creating governance solutions as well as managing its own governance issues Aaron Smith Projects Work      **Australian Cartel Regulation** Caron

Beaton-Wells,Brent Fisse,2011-04-25 Cartel regulation is a prime element of competition policy and an essential means of minimising the adverse effects of cartel activity on economic welfare However effective cartel regulation poses distinct challenges for governments competition authorities and commentators across the globe In Australian Cartel Regulation

leading competition law experts Caron Beaton Wells and Brent Fisse reflect on developments in anti cartel law in Australia over the last 30 years They provide a comprehensive account of the current law on cartels as well as discussing key issues that may arise in the future This definitive volume not only identifies the practical and theoretical issues but also recommends workable solutions and does so with the benefit of comparative analysis of the anti cartel laws of major overseas jurisdictions Many of the issues identified and discussed in Australian Cartel Regulation are common to any scheme designed to regulate cartel conduct

**Sentencing in International Criminal Law** Silvia D'Ascoli, 2011-04-01 This book deals with sentencing in international criminal law focusing on the approach of the UN ad hoc Tribunals for the former Yugoslavia ICTY and Rwanda ICTR In contrast to sentencing in domestic jurisdictions and in spite of its growing importance sentencing law is a part of international criminal law that is still under construction and is unregulated in many aspects International sentencing law and practice is not yet defined by exact norms and principles and as yet there is no body of international principles concerning the determination of sentence notwithstanding the huge volume of sentencing research and the extensive modern debate about sentencing principles Moreover international judges receive very little guidance in sentencing matters this contributes to inconsistencies and may increase the risk that similar cases will be sentenced in different ways One purpose of this book is to investigate and evaluate the process of international sentencing especially as interpreted by the ICTY and the ICTR and to suggest a more comprehensive and coherent system of guiding principles which will foster the development of a law of sentencing for international criminal justice The book discusses the law and jurisprudence of the ad hoc Tribunals and also presents an empirical analysis of influential factors and other data from ICTY

and ICTR sentencing practice thus offering quantitative support for the doctrinal analysis This publication is one of the first to be entirely devoted to the process of sentencing in international criminal justice The book will thus be of great interest to practitioners academics and students of the subject

**Criminalising Cartels** Caron Beaton-Wells, Ariel Ezrachi, 2011-02-10 This book is inspired by the international movement towards the criminalisation of cartel conduct over the last decade Led by US enforcers criminalisation has been supported by a growing number of regulators and governments It derives its support from the simple yet forceful proposition that criminal sanctions particularly jail time are the most effective deterrent to such activity However criminalisation is much more complex than that basic proposition suggests There is complexity both in terms of the various forces that are driving and shaping the movement economic political and social and in the effects on the various actors involved in it government enforcement agencies the business community judiciary legal profession and general public Featuring contributions from authors who have been at the forefront of the debate around the world this substantial 19 chapter volume captures the richness of the criminalisation phenomenon and considers its implications for building an effective criminal cartel regime particularly outside of the US It adopts a range of approaches including general theoretical perspectives from criminal theory economics political science regulation and criminology and case studies of the experience with the design and enforcement of existing or contemplated criminal cartel regimes in various jurisdictions including in Australia Canada EU Germany Ireland and the UK The book also explores the international dimensions of criminalisation its specific practical consequences such as increased potential for extradition as well as its more general implications for trends of harmonisation or convergence in competition law and enforcement

*Essays on Corporate Risk Governance* Mr. Gaizka Ormazabal Sanchez, 2011 This dissertation comprises three papers on the governance of corporate risk 1 The first paper investigates the role of organizational structures aimed at monitoring corporate risk Proponents of risk related governance structures such as risk committees or Enterprise Risk Management ERM programs assert that risk monitoring adds value by ensuring that corporate risks are managed An alternative view is that such governance structures are nothing more than window dressing created in response to regulatory or public pressure Consistent with the former view I find that in the period between 2000 and 2006 firms with more observable risk oversight structures exhibit lower equity and credit risk than firms with fewer or no observable risk oversight structures I also provide evidence that firms with more observable risk oversight structures experienced higher returns during the worst days of the 2007 2008 financial crisis and were less susceptible to market fluctuations than firms with fewer or no observable risk oversight structures Finally I find that firms without observable risk oversight structures experienced higher abnormal returns to recent legislative events relating to risk management than firms with observable risk oversight structures 2 The most common empirical measure of managerial risk taking incentives is equity portfolio vega Vega which is measured as the dollar change in a manager's equity portfolio for a 0.01 change in the standard deviation of stock returns However Vega exhibits at least three undesirable features First Vega is

expressed as a dollar change This implicitly assumes that managers with identical Vega have the same incentives regardless of differences in their total equity and other wealth Second the small change in the standard deviation of returns used to calculate Vega i e 0 01 yields a very local approximation of managerial risk taking incentives If an executive s expected payoff is highly nonlinear over the range of potential stock price and volatility outcomes a local measure of incentives is unlikely to provide a valid assessment of managerial incentives Third Vega is measured as the partial derivative of the manager s equity portfolio with respect to return volatility This computation does not consider that this partial derivative also varies with changes in stock price The second paper develops and tests a new measure of managerial risk taking equity incentives that adjusts for differences in managerial wealth considers more global changes in price and volatility and explicitly considers the impact of stock price and volatility changes We find that our new measure exhibits higher explanatory power and is more robust to model specification than Vega for explaining a wide range of measures of risk taking behavior 3 The third paper examines the relation between shareholder monitoring and managerial risk taking incentives We develop a stylized model to show that shareholder monitoring mitigates the effect of contractual risk taking incentives on the manager s actions Consistent with the model we find empirically that the positive association between the CEO s contractual risk taking incentives and risk taking behavior decreases with the level of shareholder monitoring Furthermore consistent with the board anticipating and optimally responding to shareholder monitoring boards of firms exposed to more intense monitoring design compensation contracts that provide higher incentives to take risks Overall our results suggest that when evaluating risk taking incentives provided by a compensation contract it is important to account for the firm s monitoring environment *Administrative Notes*, 1997 **Risk Management in Healthcare Institutions** Florence

Kavaler, Raymond S. Alexander, 2014 The completely revised and updated Third Edition of *Risk Management in Health Care Institutions Limiting Liability and Enhancing Care* covers the basic concepts of risk management employment practices and general risk management strategies as well as specific risk areas including medical malpractice strategies to reduce liability managing positions and litigation alternatives This edition also emphasizes outpatient medicine and the risks associated with electronic medical records *Risk Management in Health Care Institutions Limiting Liability and Enhancing Care* Third Edition offers readers the opportunity to organize and devise a successful risk management program and is the perfect resource for governing boards CEOs administrators risk management professionals and health profession students *The Language of Statutes* Lawrence M. Solan, 2010-12-15 Pulling the rug out from debates about interpretation *The Language of Statutes* joins together learning from law linguistics and cognitive science to illuminate the fundamental issues and problems in this highly contested area Here Lawrence M Solan argues that statutory interpretation is alive well and not in need of the major overhaul that many have suggested Rather he suggests the majority of people understand their rights and obligations most of the time with difficult cases occurring in circumstances that we can predict from understanding when our minds do not work

in a lawlike way Solan explains that these cases arise because of the gap between our inability to write crisp yet flexible laws on one hand and the ways in which our cognitive and linguistic faculties are structured on the other Making our lives easier and more efficient we re predisposed to absorb new situations into categories we have previously formed but in the legislative and judicial realms this can present major difficulties Solan provides an excellent introduction to statutory interpretation rejecting the extreme arguments that judges have either too much or too little leeway and explaining how and why a certain number of interpretive problems are simply inevitable Handbook on Sentencing Policies and Practices in the 21st Century Cassia Spohn,Pauline Brennan,2019-06-14 Sentencing Policies and Practices in the 21st Century focuses on the evolution and consequences of sentencing policies and practices with sentencing broadly defined to include plea bargaining judicial and juror decision making and alternatives to incarceration including participation in problem solving courts This collection of essays and reports of original research explores how sentencing policies and practices both in the United States and internationally have evolved explores important issues raised by guideline and non guideline sentencing and provides an overview of recent research on plea bargaining in the United States Australia and the United Kingdom Other topics include the role of criminal history in sentencing the past and future of capital punishment strategies for reducing mass incarceration problem solving courts and restorative justice practices Each chapter summarizes what is known identifies the gaps in the research and discusses the theoretical empirical and policy implications of the research findings The volume is grounded in current knowledge about the specific topics but also presents new material that reflects the thinking of the leading minds in the field and that outlines a research agenda for the future This is Volume 4 of the American Society of Criminology s Division on Corrections and Sentencing handbook series Previous volumes focused on risk assessment disparities in punishment and the consequences of punishment decisions The handbooks provide a comprehensive overview of these topics for scholars students practitioners and policymakers *Global Financial Issues, 2010* ,2010 **Criminal Psychology** Jacqueline B.
