Maple V: Mathematics and its Applications Robert J. Lopez, 2012-12-06 The Maple Summer Workshop and Symposium MSWS 94 reflects the growing community of Maple users around the world This volume contains the contributed papers A careful inspection of author affiliations will reveal that they come from North America Europe and Australia In fact fifteen come from the United States two from Canada one from Australia and nine come from Europe Of European papers two are from Germany two are from the Netherlands two are from Spain and one each is from Switzerland

Denmark and the United Kingdom More important than the geographical diversity is the intellectual range of the contributions We begin to see in this collection of works papers in which Maple is used in an increasingly flexible way For example there is an application in computer science that uses Maple as a tool to create a new utility There is an application in abstract algebra where Maple has been used to create new functionalities for computing in a rational function field There are applications to geometrical optics digital signal processing and experimental design **Proceedings** American Society for Engineering Education. Conference,1987 **Engineering Focuses on Excellence** American Society for Engineering Education. Conference,1987 Books in Print ,1979 **Numerical Calculations for Process Engineering Using Excel VBA** Chi M. Phan,2023-12-01 Numerical Calculations for Process Engineering Using Excel VBA provides numerical treatment of process engineering problems with VBA programming and Excel spreadsheets The problems are solving material and energy balances optimising reactors and modelling multiple factor processes The book includes both basic and advanced codes for numerical calculations The basic methods are presented in different variations tailored to particular applications Some macros are combined with each other to solve engineering problems Examples include combining the bisection method and binary search to optimise an implicit correlation combining golden section search with Euler s method to optimise a reactor and combining bisection code and Euler s method to solve steady state heat distribution The text also includes nonconventional examples such as harmony search and network analysis The examples include solutions to common engineering problems such as adiabatic flame temperature plug flow reactor conversion batch reactor heat diffusion and pinch analysis of heat exchanger networks The VBA code is presented with mathematical equations and flowcharts enabling the audience to adopt the solutions to different problems The book contains many demonstrations of numerical techniques to guide users It also includes useful summaries of VBA commands functions and Excel predefined functions accessible in VBA While the book is developed primarily for undergraduate students the book is a helpful resource for postgraduate students and engineers Scientific and Technical Books and Serials in Print ,1989 **Report summaries** United States. Environmental Protection Agency,1983 Separation Process Principles J. D. Seader,Ernest J. Henley,1998-01-23 This book examines rate based and equilibrium based approaches to separation operations It describes the fundamentals of all separation operations of commercial interest and includes theory and application examples in each chapter as well as over 600 exercises **Thermophysical Properties for Industrial Process Design** Theodore B. Selover,1994 his volume presents papers from the 1992 Symposium on Thermophysical Properties for Industrial Process Design Papers in Part I deal with new experimental techniques to provide data that are either difficult to measure by a conventional method or new data sets leading to the development of estimation or correlation of data new property estimation methods software for chemical equilibrium calculation and use of data in process design Papers in Part II cover novel experiences in industrial applications of existing models and methods for property estimation and phase equilibrium calculations Also included are discussions of

software for database management and for molecule design by property The industrial processes covered in these papers involve a range of chemical systems including non electrolytes surfactants etc A detailed key word index is also provided
