Convention,1925 Basements Complete Steve Cory,2018-03-27 Basements often get a bad rap They can be dark dank and depressing and are some of the most challenging spaces in a home to remodel But the rewards of tackling a basement remodel are potentially enormous transforming an otherwise ignored space into a bright open and usable asset perfect for a spare bedroom for guests a game room for the kids or a den for the adults In Basements Complete author Steve Cory covers the most popular remodeling approaches and projects for basements including information on preventing mold and mildew moving pipes up or over to make more headroom bringing more light into a dark space mitigating radon and sealing floors and walls Additionally some of the projects such as flooring plumbing and wiring apply to other rooms in the house but are treated here with an eye towards basement needs Though the book is largely how to it also explores some design and planning issues making it the truly complete reference title for all things basements With more than 700 photos 35 illustrations and clear step by step instructions Basements Complete is the only book that homeowners remodelers and builders will need to transform a damp basement into a warm addition **48-Volt Developments** Kevin

Jost,2015-11-09 Development of higher voltage electrical systems in vehicles has been slowly progressing over the past few decades However tightening vehicle efficiency and emissions regulations and increasing demand for onboard electrical power means that higher voltages in the form of supplemental 48 V subsystems may soon be nearing production as the most cost effective way to meet regulations The displacement of high wattage loads to more efficient 48 V networks is expected to be the next step in the development of a new generation of mild hybrid vehicles In addition to improved fuel economy and reduced emissions 48 V systems could potentially save costs on new electrical features and help better address the emerging needs of future drivers Challenges to 48 V system implementation remain leading to discussions by experts from leading car makers and suppliers on the need for an international 48 V standard Initial steps toward a proposed standard have already been taken So the consensus of global forecasts suggests that 48 V mild hybrids will soon come to dominate the market Compared with 200 600 V full hybrid and battery electric vehicles the lower voltage approach avoids the need for high cost safety features and large battery packs
