**Several Perspectives on Children's Play** Jan van Gils, 2007     **Play from Birth to Twelve** Doris Pronin Fromberg, Doris Bergen, 2006 Publisher description     *Encyclopedia of Women & Islamic Cultures* Suad Joseph, Afsāna Naǧmābādī, 2003 Family Body Sexuality and Health is Volume III of the Encyclopedia of Women Islamic Cultures In almost 200 well written entries it covers the broad field of family body sexuality and health and Islamic cultures     Physical Play and Children's Digital Games Krystina Madej, 2016-11-25 Play engages humans cognitively emotionally and physically at all ages Using a historical framework and focusing on play as represented by material artifacts such as toys and games this book explores play as a form of somatic engagement that reflects cultural attitudes about development and learning as these have evolved over time in western culture Theorists in the twentieth century such as Klein and Winnicott Huizinga and Callois Piaget Bruner and Vygotsy brought different perspectives to our understanding of play s role in our society In particular Vygotsky s theories about process provide insight into how children attend to learning and assimilate new information The

increasing use of digital media as both an entertainment and learning environment at ever younger ages is generating new discussions about the nature and value of play in children's development in particular physical or somatic play. The emphasis on games intended for children necessitates a discussion of the cognitive, behavioral, and neuroscience that supports play activities and physical engagement as a crucial aspect of development. The book then looks at the trajectory of digital games in contemporary culture and explores whether these artifacts, whether intended for learning or entertainment, have extended or are curtailing boundaries of somatic engagement. Finally, the book discusses alternative play and game design and speculates on the future of new media play artifacts.

*A History of Children's Play* Brian Sutton-Smith, 2016-11-11 New Zealand children from 1840 to 1890 were subjected to an unusual combination of agrarian existence and an industrial social philosophy in the newly formed schools. When schools became more universal in the expanding industrial society, a new emphasis on the control of children developed, and from 1920 onward, adult supervision in the form of heavily organized sports and playgrounds encroached more and more on the untrammelled freedom of the rural environment. Returning to his home country of New Zealand, Brian Sutton-Smith documents the relationship between children's play and the actual process of history. Drawing on interviews with hundreds of informants from every province and school district of New Zealand, the author illuminates for the first time the various social, cultural, historical, and psychological contexts in which children's play occurs. He treats both formal and informal play, as well as the play of both boys and girls.
