Cognitive and Affective Factors in Relation to Learning Mikaela Nyroos, Johan Korhonen, Riikka Mononen, 2022-11-10 Both domain general e.g. working memory executive functions and domain specific e.g. number processing phonological processing cognitive factors have been found to predict learning in different age groups Likewise research has shown that various affective factors such as different emotions e.g. anxiety self concept and interest need to be considered when investigating individual differences in learning However few studies have investigated both cognitive and

affective factors simultaneously in relation to learning In particular there is a lack of studies investigating the interplay i e moderation and mediation between cognitive and affective factors on learning The goal of this Research Topic is to deepen our knowledge on the relations between learning and both cognitive and affective factors in different age groups We aim to provide a broad scope of emerging areas in research on cognitive and affective factors especially related to academic learning e g mathematics reading and other school subjects Studies focusing simultaneously looking at the interplay of these constructs as well as longitudinally are of great interest Further we are interested in innovative study designs and recent advances in methodology in this field To promote quality education for all and equity in education cognitive and affective factors related to aspects of learning ranging from pre school to tertiary provision and inclusion of individuals with special educational needs are of interest
