Resources in Education

,2001-10 *Philosophical Health* Luis de Miranda,2023-12-28 Bringing together leading international and interdisciplinary scholars this ground breaking volume examines the theory and practice of philosophical health in contemporary contexts of care broadly understood care for the self care for the other and care for the world But what do we mean by philosophical health Whilst this book does not seek to provide a normative definition as it explores disparate perspectives and encourages pluralism in philosophical ways of life one may envision philosophical health as a state of creative coherence between a person s or a group s way of thinking and their way of acting such that the possibilities for a good life are increased and the needs for flourishing satisfied An idea central to philosophical health is the concept of possibility Without a sense of self possibility and openness to the future health loses meaning and conversely pathologies are defined by various kinds of impossibilities As such philosophical health reconsiders care as a process of cultivating or pruning the compossible in embodied psychological and social terms of allowing things to re generate or in some cases to vanish Drawing on the history of philosophy phenomenology new materialism post colonialism but also a wide range of contemporary approaches to philosophical practice Philosophical Health sheds light on the understudied philosophical dimension of care and the healing dimension of philosophizing Advocating philosophy as a lived practice it uncovers the increasing relevance of philosophical health to contemporary debates on well being well belonging counselling and development

From Reading-Writing Research to Practice

Sophie Briquet-Duhazé, Catherine Turcotte, 2019-04-10 Teachers regularly seek to update their practice with newly developed tools from the realm of research with the aim of applying them directly in the classroom particularly for teaching reading and writing Thus teachers continuing education is dependent on the effective dissemination and appropriation of research results This book explores this problem from multiple angles presenting research projects from France and Quebec Canada Using a variety of methods including creating teaching materials and engaging classroom teachers in the research process the authors demonstrate the importance of ownership and dissemination of research results in schools Although this necessity sometimes complicates the work of researchers it is vital to develop and maintain the relationship between reading writing research and its practical applications
