How To Build Your Own Cafe Racer:

Cafe Racer Sam Anderson, 2016-09-12 What building a Cafe Racer Really Means Successfully building a cafe racer in this case also known as a rat cafe since we ll be doing it on the cheap means creating a bike that is really light handles extremely well and on a tight twisty mountain road could outperform virtually any vehicle on the planet With enough piloting skill and we ll get into that later you can keep up with an even beat someone on a bike with much better horsepower These bikes are built for tight roads and what that means is that you get a big advantage over a guy on some crotch rocket big sports bike Even with their horsepower advantage you still win Here s why the bike is lighter and with lighter rims and tires it can flop over onto its side in a full battle lean faster and easier than anything short of the highest end and highest price regular bikes out there This doesn t mean you should go out and challenge everyone to a race however since the advantage won t be huge But on a tight twisty road up in the mountains it s enough to impress and occasionally embarrass a new pilot on a much better bike And if you drop more than 3 000 on your bike then it s a fair bet that you did something very wrong These bikes can be done cheaply and easily That light bike means not a lot of heavy expensive parts That s what success looks like in the case of building your own cafe racer When you go for rims go as light as you possibly can This is really important when it comes to creating a really high performing canyon racer cafe bike Read through to a later chapter for more details on this Your carburetor should be a well tuned factory model you ll usually want to go for a CV though in this particular book we ll go into some serious detail on carburetors so stay tuned Even better and remember we ll go over this more lately on some sort of round slide or flat slide carb If you re on the small side or even an average sized pilot you ll be able to get away with something as small as a twin 350 cc up to a 500 cc or maybe a 500 650 single cylinder motor This means about between 35 and 45 horse power If you re a larger rider you might want to try looking for something more in the 65 75 horse power range This means a bigger twin or something along the lines of a 4 banger engine of about 650 up to 750cc This means you ll want to get a classic air cooled four cylinder as opposed to something more modern like a water cooled super sport motor One of the biggest things about these bikes is the cosmetic side Everybody can tell a cafe racer by the classic retro outfitting They all have a similar look even though each one is a little different The cafe racer is not just a bike It is a lifestyle and that is often the reason why it is so important you build your own This bike is an extension of your personality and it should reflect you in every way It s important to remember that there are not many rules when it comes to building your cafe racer Most of the stuff that other people are doing involves trying to imitate what was done in England when bikers took their father s motorcycles and turned them into their own style icons This means you can turn just about anything into a cafe racer That s part of the point It s really up to you Tags cafe racer How to Build Your Own Cafe Racer build your own cafe racer cafe racing classic cafe racer motorcycle build a motorcycle cafe racer kit cafe racer royal enfield cafe racer uk building a cafe racer cafe racer dreams *Cafe Racer* sam adnerson, 2016-08 What building a Caf Racer Really
