Handbook of Culturally Responsive School Mental Health Caroline S. Clauss-Ehlers, Zewelangi N. Serpell, Mark D. Weist, 2012-12-09 Schools across the United States as well as much of the world are experiencing widespread change. Students are more diverse ethnically, academically, and emotionally. More attention is being paid to abuse and neglect, violence, and bullying, and the growing inequities that contribute to student dropout. Within this changing landscape, cultural competence is imperative for school-based professionals, both ethically and as mandated by educational reform. The *Handbook of Culturally Responsive School Mental Health* explores the academic and behavioral challenges of an increasingly diverse school environment, offering workable, cost-effective solutions in an accessible, well-organized format. This timely volume updates the research on cultural competence in school-based interventions, describes innovative approaches to counseling and classroom life, and demonstrates how this knowledge is used in successful programs with children, adolescents, and their families. Populations covered range widely from African American and Asian American Pacific Islander families to forced migrants and children who live on military bases. By addressing issues of training and policy as well as research and practice, contributors present a variety of topics that are salient, engaging, and applicable to contemporary experience, including: Adolescent ethnic/racial identity development; Culturally responsive school mental health in rural communities; Working with LGBT youth in school settings; Cultural competence in work with youth gangs; Culturally integrated substance abuse prevention and sex education programs; Promoting culturally competent school-based assessment; School-based behavioral health care in overseas military bases; Developmental, legal, and linguistic considerations in work with forced migrant children; Cultural considerations in work/family balance. The *Handbook of Culturally Responsive School Mental Health* is a must-have reference for researchers, scientists, practitioners, educational policymakers, and graduate students in child and school psychology, educational psychology, pediatrics, school nursing, social work, counseling, therapy, teaching, and teacher education, and educational administration. *Creating a "Win-Win IEP" for Students with Autism* Beth Fouse, 1999 This book is a must-read for every parent or educator who participates in the IEP process. Dr. Fouse takes readers through the entire range of a child-centered educational process, from the initial stages of identification and diagnosis to full implementation and monitoring of the individualized education program. She walks you through the process of setting goals and objectives, getting the most out of IEP meetings, determining proper placement, requesting assistive technology, and much more. She explains laws that you will need to know, inside and out, such as the Individuals with Disabilities Education Act, Section 504, Americans with Disabilities Act, and FERPA. Finally, she lists some common mistakes that schools and parents often make and gives great advice on how to avoid conflicts. **Behavior Analysis and Therapy in Residential Programs** Frederick J.
