and opportunities for a post-coal future Chandra Bhushan, Srestha Banerjee, Shruti Agarwal, 2020-11-24 Coal the backbone of India's energy and industrial sector is the single largest contributor to greenhouse gas emissions. However, the future of coal is becoming uncertain in the face of climate change concerns. Just Transition has emerged as a concept globally to ensure that coal-dependent communities and regions do not become the victims of coal phase out. It has also been included as a key component of the Paris Agreement. This book aims to understand what just transition means for India, detailing the risks and opportunities of coal phase out. It builds on an in-depth research of a top coal mining district of Jharkhand where many coal mines are already closed. It also proposes what coal mining districts and governments should do to plan for a just transition. Being the first case study from India, it offers an important perspective of the global South on just transition.
