Read the text. Then answer the questions.

Fishy Weather Conditions

By Philip Cho

Lajamanu, Australia, is a dry little town with 600 residents, sitting right on the edge of the Tanami desert. On a map, Lajamanu looks a lot closer to the center of Australia than any coast. On any given day, red dust blows down the streets, and a dry wind hurries weeds down the dirt roads. Not much happens that is new or unexpected, so imagine how amazed its residents were when live fish rained down on them from a dark gray cloud one afternoon.

That is exactly what happened in the remote Australian village. Raining fish, especially more than 300 miles from an ocean, seems like it must be an elaborate hoax. In some places, however, it happens so often that it doesn't even surprise residents any longer. In Yoro, Honduras, it happens so regularly that they have begun to predict the Lluvia de Peces, or Rain of Fishes, once or twice a year.

How do clouds make fish? The simple answer is that they don't. There is a particular weather

Which statement **best summarizes the central idea of the text**?

- ☐ A Fish adapt to their environments, and in some cases lose certain abilities.
- ☐ B Animals raining from the sky is an unusual event that can be explained through science.
- ☐ C Scientists need to capture fish raining from the sky on film before the event is believable.
- ☐ D Animals live through varying weather conditions despite extreme changes to their environments.
