Springer Handbook of Science and Technology Indicators Wolfgang Glänzel, Henk F. Moed, Ulrich Schmoch, Mike Thelwall, 2019-10-30 This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes such as the journal impact factor and the h index, as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society. It also presents and critically discusses various national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent related information. In addition, it examines the relevance of trademarks and standards as additional technological indicators.
