The way to perform the metric in scientific journals and distinguish their quality is extremely biased to a small group of publishers with large economic income, limiting to lower classification scales in publishers from countries of scarce economic resources. This is due not to the low quality in their journals and research works, but more because of their low visibility and, with this, the decrease possibility of citation. In 1955, Eugene Garfield was the one who generated the universally accepted indicator as a bargaining chip to give value to scientific journals. Still today, it continues to represent an indicator of quality for many researchers and institutions; however, it is very important to reflect on it, due to the great advances in communication that have been generated and continue to happen.

We cannot deny the importance generated by the Journal Impact Factor (JIF) or the Impact Factor (IF). However, it is of great interest to consider other more balanced alternatives to measure the impact of a journal and its content. It is notorious the advance in science in all its dimensions. The field of health sciences has grown substantially and, thanks to the development of communication and dissemination of knowledge, there is better access to writings from different parts of the world almost immediately. This greater visibility was not available more than 60 years ago.

We must analyse if the measurement of the quality of an article or journal should continue to be based on IF. There are many authors who point out the disadvantages and limitations of this metric, and even propose another journal rating score as Eigenfactor, as a more updated and balanced metric.

Development

The Journal Impact Factor (JIF) has been the mainstay of the academic and scientific publishing

community for 60 years. It is defined by the relationship between the received citations and the articles published by a journal and is intended to represent the value and prestige of an academic journal^{1,2}. Initially, it was a useful metric in paper and library-based writing. The movement toward the digital and interdisciplinarity age has significantly changed the way we search for information and the growing desire for open and hybrid access. In time, knowledge distribution models have led to the depreciation of the JIF. However, Nestor et al. points out that conversely, academic editors have looked at the JIF to the point of obsession³. This concept represented the base on Eugene Garfield's idea to develop a citation index in 1955. He purposed to measure the influence of a journal, or the "Impact Factor", based on the number of citations received by its articles, in which it alludes that the articles that generate numerous citations are usually considered important or influential⁴. Therefore, journals with a large number of citations per article are often viewed with greater consideration in the eyes of the knowledge seeker community. Since its inception, the JIF has been used as a method to measure the credibility and importance of a journal. This metric tool had a great importance before the widespread use of the Internet, when libraries were somewhat forced to choose the journals on which to spend their limited budgets for their users. It is fair to sustain that the JIF has served its purpose in this regard, as it provides a general measure of citation rates and gives insight into the attention given to a journal. Typically, the highest quality journals in a specific field are scored with the highest JIF. However, for a long time, there have been many limitations and flaws relating to the JIF score. As technology advances and information search strategies have evolved, it appears that the JIF has become obsolete for the scientific community^{5,6-10}.

Impact Factor Scientific Journals 2list Introduction

In the digital age, access to information has become easier than ever before. The ability to download Impact Factor Scientific Journals 2list has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Impact Factor Scientific Journals 2list has opened up a world of possibilities. Downloading Impact Factor Scientific Journals 2list provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Impact Factor Scientific Journals 2list has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Impact Factor Scientific Journals 2list. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Impact Factor Scientific Journals 2list. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Impact Factor Scientific Journals 2list, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Impact Factor Scientific Journals 2list has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for

students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
