Turning a School Around Josh Martin, 2019-12-06 Currently in education everyone is debating what is required to turn around struggling campuses. Some argue the need for additional programs, some suggest merit pay to bring in and retain the most effective teachers. What this book will argue is that it rests solely on the shoulders of the principal. As the book will discuss, it is the principal's job to hire and train quality teachers to ensure students receive the high quality instruction they deserve. In order for principals to accomplish this task, there are certain aspects of instructional leadership they must understand and be able to put into practice. Principals first and foremost must truly understand instruction. Principals must understand how to evaluate students and teachers through formative assessment. Principals have to find ways to get into classrooms as opposed to finding ways that keep them out. Finally, principals must understand data well enough that they can truly hear the story the data is telling. It is through these aspects of instructional leadership that principals are able to turn campuses around.

Vygotsky and Literacy Research Peter Smagorinsky, 2012-01-01 In this book Peter Smagorinsky reconsiders his many publications employing Vygotsky's theory of culturally mediated human development and applies them through a unified and coherent series of chapters to literacy research. This exploration takes previously published work and incorporates it into a new and sustained argument regarding the application of Vygotsky's ideas to current questions regarding the nature of literacy and how to investigate it as a cultural phenomenon that contributes to human growth in social context. To conduct this inquiry, Smagorinsky first provides an overview that contextualizes Vygotsky both in his own time and in efforts to extrapolate from his Soviet origins to the 21st Century world. This consideration includes attention to the current context for literacy studies. He then reviews current conceptions of literacy in the realms of reading, writing, and additional tool use, grounding each in a Vygotskian perspective. The book's final chapters take a critical look at both research method and the writing of research reports, taking into account both research and research reports as social constructions based in disciplinary practices. On the whole, this volume makes an important contribution to Vygotskian studies and literacy research through the author's careful alignment between theory and practice.
