The Oxford Handbook of Comparative Environmental Law

Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law. It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points: country studies from all continents; responses to common problems including air pollution, water management, nature conservation, genetically modified organisms, climate change and energy, chemicals, waste; foundational components of environmental law systems including principles, property rights, administrative and judicial organisation, command and control, regulation, market mechanisms, informational techniques and liability mechanisms; and common interactions of environmental protection with the broader public, private and criminal law contexts. The volume brings together the foremost authorities in this field from around the world to provide a concise, self-contained and technically rigorous account of environmental law as a single overall system.

Human Rights Behind Bars

Clara Burbano Herrera, Yves Haeck, 2022-11-14 This book brings together leading authorities from the fields of international human rights law, criminology, legal medicine and political science with international human rights judges and UN experts to analyze the current situation of detainees in Europe, the Americas and Africa. This comprehensive volume offers a platform for reflecting on the complexity of the prison problem from a multidisciplinary perspective. The authors address detention-related issues with the aim of generating new ideas that contribute to both academic discussion and critical analysis. Academic dialogue across the globe provides insights into various national and international carceral systems and how they deal with human rights behind bars. At the same time, the critical comparison helps to identify basic needs and practices that can work in multiple settings. The contributors are respected experts and leading scholars in their fields, and each has pursued prison and human rights research over the last decades. However, this is the first time that they have come together in a multidisciplinary academic project. This book aims to stimulate diverse actors to imagine alternative ways of engaging with persons deprived of their liberty in academia and in practice.

The Lawyer's Style Guide

Peter Butt, 2021-02-25 Clarity and precision in legal writing are essential skills in the practice and study of law. This book offers a straightforward practical guide to effective legal style from a world-leading expert. The book is thoughtfully structured to explain the elements of good legal writing and its most effective use. It catalogues all aspects of legal style, topic by topic, phrase by phrase, usage by usage. It scrutinises them all, suggesting improvements. Its dictionary arrangement makes it easy to navigate. Entries cover matters such as abbreviations, acronyms, active and passive voice, brackets, bullet points, citation methods, cross-referencing, fonts, document design, footnotes, gender-neutral language, numbering systems, plain legal language, punctuation, the use of Latin in law, structures for legal advice and documents, and techniques for editing and proofreading. Also covered are many words and phrases that non-lawyers find opaque and obscure, the aim being to show that lawyers can usually substitute a plain English equivalent that captures the legal nuances of the legalese. Other topics include ambiguity, deeds, definitions, provisos.

recitals simplified outlines terms of art tone and the various principles of legal interpretation With an emphasis on technical effectiveness and understanding the book is required reading for all those engaged in the practice and study of law *Lady Astronauts, Lady Engineers, and Naked Ladies* Karin Hilck, 2019-07-08 The book *Lady Astronauts Lady Engineers and Naked Ladies* is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States the book analyzes several different groups of women interacting in different social spaces within the space community It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces where the women lived and worked are researched from a media individual and institutional angle ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century *Doing Politics* Michael Kranert, Geraldine Horan, 2018-12-15 This edited volume explores the discursive performative and mediated dimensions of contemporary political discourse The strengths of the volume are manifold it contains cutting edge interdisciplinary research on political discourses by international authors UK USA Italy Germany Austria Denmark in political science discourse linguistic and social interaction research The contributions represent a wide range of methodological approaches to political discourse analyzing a broad variety of genres some of which have been less

analyzed to date for example Wikipedia articles in combination with their discussion pages or the interaction between politicians and voters in the constituency office of a British Member of Parliament The contributions also focus on political discourses of high and relevant topicality such as EU membership of Britain populism migration and xenophobia terrorism and narratives in international relations

Debating Judicial Appointments in an Age of Diversity Graham Gee, Erika Rackley, 2017-09-11 What should be the primary goals of a judicial appointments system and how much weight should be placed on diversity in particular Why is achieving a diverse judiciary across the UK taking so long Is it time for positive action What role should the current judiciary play in the appointment of our future judges There is broad agreement within the UK and other common law countries that diversity raises important questions for a legal system and its officials but much less agreement about the full implications of recognising diversity as an important goal of the judicial appointments regime Opinions differ for example on the methods forms timing and motivations for judicial diversity To mark the tenth anniversary of the creation of the Judicial Appointments Commission JAC in England and Wales this collection includes contributions from current and retired judges civil servants practitioners current and former commissioners on the JAC and leading academics from Australia Canada South Africa and across the UK Together they provide timely and authoritative insights into past current and future debates on the search for diversity in judicial appointments Topics discussed include the role and responsibility of

independent appointment bodies assessments of the JAC's first ten years appointments to the UK Supreme Court the pace of change definitions of merit and diversity mandatory retirement ages the use of ceiling quotas and the appropriate role of judges and politicians in the appointments process
